Thread: [Official Group - Genesis - Graphics Request \\$100 USD BTC](#)

DevNet - February 11, 2017, 3:44 pm

Yes I'm approved.

Yes this will be an official group.

(Feb 11, 2017 04:51 PM)Omniscient Wrote: [\[CITE\]](#) Confirmed. I really wanted a group related to Crypto here. I truly hope that OP runs a great group. I'm looking forward to their ideas.

Group info:

Code Group Name: Genesis

Group Information: All things crypto

What I need

Userbar - 136 x 42 pixels(width & height)

Forum Icon - 40 x 40 pixels (width & height)

Header - Whatever is fitting for the concept you develop.

Divider - Up to you for the size.

Idea / Concept:

Look at the userbars I like, I want the following themes to be somewhat apparent: Currency, Bitcoin, Cryptography, (networks?).

Be creative. I expect you to be able to come up with an identity fitting what I just described.

Naturally, I expect to be supplied the source files upon payment.

Userbars I like

In order (somewhat). I'll add more once I find time.

Feel free to surprise me and post as many variations as you want!

Interested to see what some of the more prominent userbar designers come up with for this one.

I appreciate gradients, and like I said something resembling crypto currencies or cryptography would be ideal.

I understand these might be hard to work with on a dark background.

FiftyTwo - February 13, 2017, 10:56 am

Not a graphics designer but never entered into one of these before so here you go.

The dollar sign demonstrates today's most used currency.

The lock demonstrates crypto.

The bitcoin demonstrates currency (so cryptocurrency).

The lines in between show a network and show how the future is planned - from dollars to cryptocurrency.

Alterations:

Another concept:

Here the idea was to craft something beautiful, that relates to the group and OP's examples. Something members can proudly wear as a symbol of their group and stand out, considering most userbars lately as pretty much similar. Each phase of the moon refers to one letter of GENESIS and that's what I plan to have for the header, if this wins obviously :)

Let me know what you think about it and if you'd like any changes or likewise.

Ah sounds great. Will try and talk to Doge today, the only problem is that we live in different timezones and it's rather difficult to keep in touch.

That said, the reason for my inactivity lately is that I now have a business going in a goldmine and we are literally making more \$ than I can handle right now.

Oh wow, that's really nice haha. Congrats on your business, will be hopefully creating my own in the future.

I'm working one one right now. This is really exciting to work on because I've been really interested in crypto currencies for a long time.

You need to tell people what you want I have seen plenty of good userbars on this thread.

With all due respect I believe the OP is very clear, and the submissions are not up to par at all.

You ignored all feedback we gave you, not a single change has been made and now you are asking for more.

Good luck with your graphics.

No I have not ignored anything mate I have taken every single one of those into consideration. You just can't expect me to be sitting on this whole day making and changing one userbar. I will do the changes once I'm available, I have a full time job besides doing stuff freelance online which means I will do it when I'm able to and when I hear enough feedback by people. Everybody has a different taste in designs and not everybody is going to think it's awesome, that is something we call a freedom of speech you have said your opinion and there is no need to push me in this I have submitted my first entry not very long ago.

Update: Here is a bit cleaner looking entry with some outlines removed and placements changed.

Will post different entries & more edits most likely tonight when I get some free time to play around. :)

Sorry quickie but I don't like it way too bright and complicated with too many stuff.

Looking forward to this group and what it will bring.

If I could make a graphic it would be like a gold flame with a coin on the end. I have the picture in my head..
