Thread: [Need help with very simple python question.](#)

FrogSquad4 - February 11, 2017, 6:47 pm

How do I get it so when a name is inputted it will say Hello "name inputted"

This is what I have so far below.

```
print ("Hello")
```

```
input ("What's your name")
```

TheWarOwl - February 11, 2017, 7:27 pm

You need to store the input into a variable.

For python27:

PHP Code

```
<?php
name = raw_input("What is your name-> ")
print "Hello %s!" % name
```

OR

PHP Code

```
<?php
name = raw_input("What is your name-> ")
print "Hello "+name
```

For Python 3:

PHP Code

```
<?php
name = input("What is your name-> ")
print ("Hello %s!" % name)
```

OR

PHP Code

```
<?php
name = input("What is your name-> ")
print ("Hello "+name)
```

You should take some courses on www.codecademy.com (it's free). This is a very simple question and can be answered in the first 1-3 lessons ?

captainspalding - February 11, 2017, 8:35 pm

2.7

```
Code name = raw_input("What is your name? ")
```

```
print('Hello {}'.format(name))  
3.x  
Code name = input('What is your name? ')  
print('Hello {}'.format(name))
```
