(Feb 24, 2017 11:27 PM)Fortunate Wrote: [\[CITE\]](#) Vouch for V9cheats. I have used the cheat for a day and it works like a charm. (Dec 19, 2017 11:09 AM)Almonds Wrote: [\[CITE\]](#)

I used cheats every match, if used correctly they are very human-like and can easily pass off.

Vouch! A+ (Dec 25, 2017 01:49 AM)Kash Money Wrote: [\[CITE\]](#) bought last night, added the admin for some help answered right away, very fast support.

great that you get the cheat instantly after purchasing,

cheat is very simple but effective (very good because of the security!)

if youre looking for simple cheats to help make the game easier for you this is good, might still need a little skill but the security and detection rate is what makes it good.

give this cheat a 8/10! highly recommend

Also you should change the title, it is not a "private" cheat when it can be purchased publicly by anyone.

Not trying to be a dick here, just pointing out that people use the word private to much for stuff that isn't a private.

It's not a public cheat because it cant be purchased publicly by anyone??

phunted - February 14, 2017, 11:14 am

(Feb 14, 2017 12:03 PM)Brain Bot Wrote: [\[CITE\]](#) slots limited, invite are all cheats that are "public" because it can be purchased by basically anyone at least anyone can apply.

"Private" means a build for that person only, which is not the case here.

big difference.

I think "Limited" would be a better suited word.

I do agree with you even though I'm using this cheat atm.

D?ceived - February 14, 2017, 11:55 am

(Feb 14, 2017 12:41 PM)int main() Wrote: [\[CITE\]](#) Private can be used in plural not only singular "a private place"; "private discussions"; "private lessons"; "a private club"; "a private secretary"; "private property"; "the former President is now a private citizen"; "public figures struggle to maintain a private life"

Private doesnt have to concern one person only:

Private english lesson for two kids not a slot limited english class

Besides you're being ambiguous you just said what a public cheat was and i said the complete opposite and now that you aren't satisfied with my answer you change your statement to something different because you dont want to be wrong.

Also don't tell me how I sell my cheat I'm telling you that I don't sell it to anyone you have to meet certain requirements and I decide if I want to sell it to you within the first four sentences that you

send me.

Thanks for clarifying on that so people understand

champagnepapi - February 14, 2017, 11:57 am

What's the price of this if i may ask?

I agree, that video is pure cancer.

If you guys need a professional showcase video made hit me up.

int main() - February 15, 2017, 7:45 am

Better video is in the works, feel free to pm on forums / skype to purchase!
Everything's work excellently since yesterdays update

Suwoo - February 15, 2017, 8:13 am

I think you need to adjust your price point here, you have a pretty standard what I assume to be external trigger and esp. Looking through the features of your cheats I just don't see where you are justifying the 25/month price. I see no mention of any special protection or even just have individual builds (wouldn't be hard to accomplish if theres a limit of 30 people) which are both things which could justify the price, there is not even an aimbot (which is a pretty standard feature itself and it would be justifiable not having this if it were a lan cheat etc. but it is just a standard external), and there is no way to back the claim that you have of being "2 years undetected" having a cheat that only you/ a couple friends use and counting that in your UD time is pretty cheap seeing as anyone could c+p a cheat and keep it to theirselves in turn keeping it UD.

And again not sure 100% about the claim of it being a basic external but even if it is an internal with your own hook its kind of pointless with the current features especially because you lose out on being able to claim its stream friendly because half of the features of your hack would be able to be seen by recording software if internal.

Not trying to sales trash just being critical

DOG - February 17, 2017, 1:46 am

I'm not suggesting this cheat.

I added the guy on skype, I was interested to buy to test but after a few basic question about how he code the cheat or the security he is using, he couldn't reply or understand. The guy was rude and not professional at all.

I wouldn't suggest him at all.

If you are not believing me, please just add him and talk to him, try to get some information.

DWC.

If anyone remembers the post which I made earlier saying that I decide whether I want to sell the cheat to the person from the first 4 sentences then you would know why I did this, and now some may say why I didn't simply tell him that I'm not interested in selling is because I was having a bad day and needed to have a laugh (of course not the best place of getting my laughs but I felt the need to and since I didn't count him as a customer at all(and wouldnt have for any amount of money) I did what I did.

<https://hastebin.com/jilekocuwi.vbs>

<http://prntscr.com/e9ujl9>

Full chat log for anyone interested. I've done this to multiple people but you seem to be the only one to get butthurt and not get the joke / hint. Contact me in a professional way then I'll respond professionally.

Only contact me for what we're selling on the thread not anything else otherwise this will happen to you as well.

For anyone interested in the cheat It's fully working after todays update and a professional video is being made.

If you had nothing to hide why didnt you just answered me. I would have my proof, and i wouldn't make this post. But no you were just rude to me without even normally talking to me.

Edit: i sent him a message "let's try this again" to be give him a chance to talk normally with me and

resolve this situation but he respond me"nope you're permanently denied from purchasing any of my products, for ever."

So why would you post on hf to retry it professionally if you are doing this again unprofessional..

Sounds sketchy right?

Ps: cant post this here cause of hf rules (trashtalk sales) but pm for more proof

int main() - February 17, 2017, 2:25 am

Idk so I dont wan't to false advertise

Xeenon - February 28, 2017, 3:18 am

Why does it say there is an 'AntiLeak' on your website? What does this so called 'AntiLeak' do and how does it make sure nobody is getting access to your cheat without paying?

morph - February 28, 2017, 3:34 am

(Feb 28, 2017 12:18 AM)int main() Wrote: [\[CITE\]](#) Idk so I dont wan't to false advertise

Oh, okay. So let me get this straight, you are advertising that you are giving out "unique builds" but you have no idea how unique it is in memory? You probably don't know this, but VAC scans memory, not files on your disk. I also want an answer to what Lookin asked.

int main() - February 28, 2017, 6:49 am

If you knew anything about what you're saying then you would know that i can't give you an exact percentage but sure if you want me to say a number then about 90%, and I probably do know otherwise I'd of gotten detected 2 years ago with the 60 users base I had which is not big but still requires the knowledge you mentioned.

If you require more information you may add me on skype and I'll personally make sure the important questions you ask are put in a FAQ which every member can read. this is a sales thread, not a support thread and It's basically anti debugging measurements and hardware identification processes

You keep claiming this, however you said it yourself. There was no posted in 2016. Then suddenly in 2017:

'Bringing this back from the dead. I'm back, and never been better, I sincerely apologize if I offended anyone and if my previous customers can provide proof of payment I'll figure something out.

Cheat is pretty much still the same with bug fixes and some removed features.'

So no offence but this hasn't been out for 2 years.

By this I can create a product now, start selling it for a few months, then stop. And 5 years later start up again and claim 5 years undetected.

ProfessorSpace - May 24, 2017, 2:52 pm

Vouch, i bought this hack a few hours ago and finally decided to test it, for being unique as it is i can say this, the hack alone has one of the best initialization i have ever seen, ive never seen a hack which you can launch mid game without the risk of detection which means as far as toggling it take literally seconds. now lets break down this review into sections

Aimbot

This being a main feature for every hack our there still needs work
within the first few minutes a bug fell into my lap, this may be user error but a bug none the less
however the aimbot does get the job done with 5 games played ive never been called a cheater

ESP

this can be a little laggy not per-say in frames wise but sometimes the boxes will lag behind the player just a small amount so its not so bad you cant use it but its enough to be visible i dont consider this to be a need to be worked on because i did at all times know when a enemy was near me

Trigger

This absolutely need a little bit of editing
maybe im wrong but this needs to have a setting option on the milliseconds it should wait before firing
it made it look like i was hacking when i could insta kill someone as they became visible

Removals

I only tested no recoil and it did its job perfectly
no recoil for days

Bhop

This needs more work definitaly, i would suggest making 2 different types of bhop
Perfect and legit there was no tutorial on how to make the bhop work and i was never able to get this done

overall 7/10

What could be done to improve this?

Aimbot

Needs more options

for an example what guns to enable to aimbot for

triggerbot

should allow us to set the delay before it shoots to make it look more real

esp

bone esp

weapon esp

heath esp (swap between a bar and number)

Misc

Bhop should have a custom set bindable button to press

Bhop should have a mode (perfect and legit) perfect you always land a perfect jump and legit a random jump will fail up to 9 jumps

Would i recommend it to a friend

Perhaps if it has more options for the price but overall yes i would

D?ceived - July 25, 2017, 12:14 pm

Cheat once again updated to the latest version

Anchovy - July 30, 2017, 5:26 pm

Cheat has extremely limited options. Smoothing skips around unhumanly and the FOV is extremely strange with the max being 178? Aimbot key is also limited as they only give you a few keys to choose from and i hate everyone of them. the ESP is extremely buggy and looks flat out bad. Gunna have to give this one a 1/10 tbh. This cheat is being sold for \$20 and is only worth 5.

EDIT: after connecting to TeamViewer with Deceived the issues straightened out. The ESP is still buggy. But the aimbot is working better. Although these were straightened out i still wanna give this cheat like a 5/10 just because its really expensive for what it actually is. Ive \$5 slotted external cheats with more flexibility than this. If you're rich and just dont care, this cheat is okay i guess. I have confidence that they will keep this cheat updated though cause Deceived did seem concerned about the issues i was having and had extremely fast support.

D?ceived - August 1, 2017, 5:24 am

Mega update

Cheat core code completely rewritten and optimized, cpu usage reduced, features added, and features fixed.

Changelog:

Fixed issues with values such as fov only going up to 178 and smooth to 97 and other values
Fixed esp bugs, and changed esp style (image below)
Standalone rcs (lag) fixed and added customizable rcs smoothing
Added FOV changer
Added no hands

Menu picture:

slickigaslickis - August 1, 2017, 10:39 am

Nice hack and nice seller

FaceTehWind - August 1, 2017, 12:12 pm

PART 1 (can only post 8k characters at a time and this whole review is over that)

Before i start this review i would like to say i use this cheat on my main steam account which is level 50 at this moment, and 4 or 5 other smurf accounts and i have no current vac bans or ow convictions by using this but! It depends on how you play with the features, if you were to use esp and you get ow ban it's your fault not the creators.

I'm going to be creating my own vouch review, i bought the lifetime subscription of this cheat.

1. Aimbot

Aimbot Toggling

Aim Key

Bone Aimbot

- Auto-Shoot
- Customizable Aim Key
- Customizable FOV (1-180)
- Customizable Smoothing (1-100)
- Recoil Control System

2. Triggerbot

- Triggerbot
- Triggerbot on Key
- Delay
- Auto-Shoot / trigger key

3. Visuals

- Esp
- Crosshair
- Box
- Health
- Radar

4. Misc

- No-Flash
- Recoil Control System
- Bunnyhop
- FOV changer
- No hands

I've made a bad contents table at the top which you can see all the current features in this client, I'll be going through one by one each part explaining what I think of it.

GUI - I didn't add this to the features list since it's how you would access them features, it's something which should allow easy accessibility for the user of high knowledge or low knowledge when applying settings. When I first saw the menu my first instinct was to use the arrow keys and it allowed easy and quick maneuvering over the GUI. I easily inputted the settings I wanted and enabled and disabled the ones I didn't, it allowed quick experimenting with the current features without any hassle.

Aimbot - This is the most talked about feature in this client since it's supposed to act as a legit aimbot and is made to be one. I can definitely agree with this since when playing I have it on 1 fov, 2 smoothness which allows an addition of help to my superb aim. As the title above says it can go up to 180 fov which sure can be impractical but as a legit aimbot having it at 1-3 is more than enough in gameplay to look realistic.

Aimbot toggling / aimkey - There are 9 different keys currently allowed to toggle the aimbot with, some are. Mouse button one, mouse button 2, shift, control, alt and a few others. These are simple keys which let the aimbot to work efficiently. I personally keep it on the default mouse button one which is the fire key. But if you want to maybe set it to a mouse button on the side of your mouse and bind that button to a key like shift or control if you don't use it then it works just as well.

For aimbot toggling the way it works is you press the key it locks on to the person's body part which

you set, with 1 fov 2 smoothness it's impossible to see and it looks like legit aim.

Bone aimbot - So every bone in csgo has a number assigned to it

T SIDE (<https://i.gyazo.com/9de4ca3e624328985521ca14382306cf.png>)

CT SIDE (<https://i.gyazo.com/72ab161e4c1e4e779f796e6c8830718a.png>)

The links above are the bone structure of the two different models but in the cheat, it won't give you the numbers and instead have specific bones like; Head, neck, body etc. The bones which are given to choose from is the one the aimbot will lock onto. As writing this "lock on" seems a bit eh and fishy sounding but it's not any of them both at all. The lock on is stuttle depending on the way you set up the aimbot. If you have 180 fov, 90 smooth it'll be an obvious lock on and that in gameplay standard it's unrealistic.

As I mentioned before I use 1 fov and 2 smoothness which doesn't show any lock on at all and it looks like legit aim but bring that up to 180 fov it'll snap on to them.. but again normally you won't use that fov at all and you'll keep it at a normal legit standard.

Customizable FOV (1-180) / Customizable Smoothing (1-100) - The aimbot is very customizable and can go up to 180 fov and 100 smoothness. This allows unique gameplay to occur from a normal legit looking player and a crazy, 180 turn no scope crisp lock on, mhmhmhmhmhmhmhmhmhmhm.

But depending on your aim level and how you play you can customize the aimbot to fit your play style, for example. I play with 1 fov and 2 smoothness and with my superb and amazing godly aim and with my aim I don't need to put the settings higher since I can hit shots normally without a higher fov lock. But smoothing is very important to utilize as well as fov. Smoothness will smooth the angles and slow the aimbot to bring a more legit feel to the viewer's eyes.

What i recommend is going into a custom game and trying out the setting with this command "mp_respawn_on_death_ct 1" or "mp_respawn_on_death_t 1", bot_stop 1, bot_freeze 1 and of course mp_roundtime_defuse or what ever that time command is >:C. Setting the first command on 1 will respawn the bots once you kill them but also freeze them so you can test how the lock on looks with the aim key or an additional key. This greatly helps with identifying how effective the settings you're using are and it only takes a few mins! You can also experiment with other features as well before starting a comp.

RCS (Recoil Control System) - It seems that it calculates the angle from the crosshair to the enemy and then compensates for the y axis so I'd assume they're in the same function, very good work done on this feature. RAMZ SMART C: but overall this works well and each gun has their own recoil pattern imprinted.

PART 2

Triggerbot - In my opinion this is one of my favorite settings a lot with sexy CHARMS. mhmhmhmhmhmhmhmhmhmhm hmh. BUT a trigger bot can be useful and useless depending on how it's made. In previous clients I've used the triggerbot has come along with a delay on the shots inbetween so like this: Shoot - wait - shoot - wait.

The way this one works is: wait- shoot- wait - shoot.

This is a huge difference in gameplay and this is how a triggerbot is supposed to be made, it allows

easy and quick delay shots to be fired while also having a delay which brings a legit look onto the trigger bot since when they peek it won't instant headshot them. That's an instant report with that bad aimbot >:C AND RAMZ NO LIKE REPORT

Auto shoot / trigger key - This trigger bot current has a trigger key option only, no full active mode. This works by having it binded to one of the keys they assign such as control, alt, shift, mouse 1, mouse 2, middle mouse etc. When this key is held down and the player hover overs the enemy body it will shoot with the set delay. It's nothing complicated and a simple usage.

Esp box and health - These two are separate features but I'm putting them into one evaluation since you would normally use them together. But these are simple and they just show a esp box around the enemy player with their current health bar. This works fine and allows you to see where an enemy is through walls but in my opinion I would avoid this feature since many people do get overwatch ban since they play obviously with the info they gain from it.

Radar - This is very useful to turn on and what it does is show enemies on the radar even when not seen but this does have a radius limit like all visual hacks but the radius is big and easily can be taken advantage. This works very well and makes it easy to find enemies by having map awareness :^).

Crosshair - this is a simple visual feature which adds a nice red dot cross hair in the middle of yours, I like this since the dot is easy to see and play with, it can be extremely helpful with the scar or the awp for no scopes.

Misc

No flash - This is a simple misc hack which can be used and what it does is blocks flash bangs from effective your view. If a flash is thrown the blinding effect won't blind you and leave you unblinded to have the advantage over the enemy. Again not recommended to use in my opinion because if your blinded and you kill someone, it'll be seen as fishy.

FOV changer and no hands - These two features recently got added and both of them work as they should, the fov changer ranges from 90 FOV which is the base FOV to 150 which is the max fov I believe. There is the addition of no hands too which makes your hands disappear :O and leave you with a floating gun.

Bhop - Currently this feature is under maintenance to add the best bhop experience available and I believe it'll be as hq as their other features.

So uhm this was ramz's review....

uh, thanks for reading till the end?

yeh bye...

I like cheese

OH NO I FORGOT WHAT I RATE IT

well im not too good with numbers so I'll give it like

well uh hh

hmmmmm

like a 9.0/10

Anchovy - August 1, 2017, 2:18 pm

Okay so the devs made this new update and im liking it. The Aimbot is very hard to tell im even using an aimbot. Very legit looking. I have not even once (and i have 8 wins with this cheat so far) not been called a hacker. I rarely use ESP as i dont see a need for it when legit cheating. Also the trigger bot is very good, not complaint with it at all. You can even change the milliseconds it takes to shoot. This owner of this cheat actually cares about his customers. Support is a 10/10.

After this new update, and seeing that they will continue to make it better.

Just because of the price im going to have to give it a 8/10

Aimbot: 8/10

ESP: 7/10

Security: 10/10

Support: 10/10

triggerbot: 10/10

RCS: 8/10

Radar: 7/10

Bunnyhop: 10/10 no auto strafe which would help but eh its a legit cheat so it really doesnt matter

D?ceived - August 1, 2017, 3:16 pm

there are only 2 remaining bugs, the latest update patched every single known bug but these two which will be patched as soon as free time comes. I have nothing but great reviews on my sales thread since the update.

Bob White - August 1, 2017, 11:37 pm

I've actually had this since before it was being sold, I have yet to be banned and I am killing it in ranked. I know I am not supposed to cheat in ranked but it's just so tempting. Thanks for giving me the cheating edge I needed lol.

FaceTehWind - August 4, 2017, 3:19 pm

Constant updates, safe builds, great support. Perfect cheat.

LiveMChief - August 6, 2017, 12:49 am

Contacted the owner for an inquiry of the cheat saying I was interested he then preceded to make fun of the way I used "was" in the sentence so which I said "thanks for the explanation and now I WAS interested" then I removed him, to which his response was to re add me then say I am the most untrusted person in the world and I am rep fucked on 3 forums(no idea what he's talking about) and called me a "stupid n*gger"

Very unprofessional owner.

NA Riven - August 7, 2017, 9:20 am

Using the cheat RN will update it after my game :)

Anchovy - August 10, 2017, 7:55 am

Recently I came across a problem with the cheat and i contacted the owner.

The cheat would not work and I was just asking for support.

The Conversation lead south after he decided to be extremely disrespectful to me just because i was asking for support.

Here is the conversation:

Spoiler ([Click to View](#))

The 15 days he is talking about is after i changed my vouch to a good vouch because of how much they seemed to care about quality when i pointed them out. He gave me 15 days free in response to the vouch because i guess he was happy that i had done it. In no way had i asked for that 15 days. He just gave it to me as a gift. After him not replying for 2 days i contacted deceived (Deceived told me to talk to Josh Peck when i find problems or need help, i think he is a second owner or something.)

Deceived helped me with my issue by giving me a build that is before the mega update, im guessing until they fix the current update.

in this first screenshot i was in no way being rude. Just asking why he ignored me for 2 days and why he couldnt tell me he wasnt home. He assumed i was asking for an extra 2 days, when i was in no way doing so. At no point had i requested an extra 2 days.

The conversation continues.

Spoiler ([Click to View](#))

Last time i checked, telling the owner of a cheat that it isnt working, and asking why they chose not to help for 2 days, isnt unnecessary. In fact that should be very important to listen to from a customer. But some how he took it as an insult, I guess in some narcissistic way to make it looks like he was in the right and im wrong. This is the point where he really starts to get childish. Telling me he'll replace my 15 extra days with 2 extra days. Saying "I hope that makes you feel cool" after apologizing. Doesnt seem like a real apology to me if you ask me if the apology makes me feel cool. Real unprofessional on his part.

Conversation continues

Spoiler ([Click to View](#))

Here he gets really childish. Telling me he doesnt care about my vouch, saying the business doesnt make profit for it so he doesnt care about the vouch. Claiming he wants to deliver what he advertises, i guess trying to make him self look like the good guy in the situation. Then he tells me " And you're very salty for some odd reason idk if you've had some issues irl or not, but I dont work for you so don't write to me as if you own me or anything. I wasn't available and I'm sorry but theres nothing I could have changed to be available "

This really got me pissed off because i've never had someone that i paid money to for a product act so childish. This was just icing on the cake. Then afterwards telling me he will not help me anymore because he has no interest. Acting like a smart ass saying "Thank you very much for being such an amazing customer".

If you are looking to purchase v9 Cheats, look some where else. Not to mention this cheat isnt very good for only \$20. The coders are a mess. I dont think they actually know what they're doing. They're damn good at giving off a first impression. But later in the game you get no where near the help you did in the beginning.

Owner is a true asshole, buy anther cheat. For your own sake.

If youd like to see a log of the entire chat with Josh peck, and more, here you go

[https://drive\[WARNING POSSIBLY INFECTED\]google.com/file/d/0B5r05Bhpc-ZtNWMwcWIDRTFMa1k/view?usp=sharing](https://drive.google.com/file/d/0B5r05Bhpc-ZtNWMwcWIDRTFMa1k/view?usp=sharing)
(take html code and paste it into notepad, change from .txt to .html and open it)

D?ceived - August 10, 2017, 8:19 am

Not going to even bother reading what you wrote, this user has been nothing but disrespectful to the

developer, and I'm the owner of this not him. I'm simply going to post the chat log between him and the developer and you can make your own mind up, no further comments will be made on this user as he's been nothing but trouble since the very first day, you can read his previous vouch on my "shit hack". Thanks, the cheat has been updated and everything is functioning as normal with nothing but happy customers.

full chat log: <https://pastebin.com/9x12KcWC>

Please not that the developer has ADHD and I believe the way he handled this was very professional and fair to this ignorant user. I'll be making sure to never have a customer like him again.

Anchovy - August 10, 2017, 8:23 am

(Aug 10, 2017 08:19 AM)D?ceived Wrote: [\[CITE\]](#) -snip-If you wouldve read what i posted i already had chat logs. I was in no way "extremely disrespectful" and ADHD is no excuse. Thats just ridiculous.

edit: i like how you changed your reply after you saw mine. You are obviously aware of how unprofessional he acted.

Spoiler ([Click to View](#))

D?ceived - October 11, 2017, 12:19 am

Cheat recently updated and did some humanisation improvements with the aimbot

JackintheboXXX - October 15, 2017, 2:17 pm

Nice guys... great job surviving the vac wave. Should have went with you instead of aimware. Will come back to this later.

(Apr 12, 2018 07:53 AM)D?ceived Wrote: [\[CITE\]](#) If you could please provide more information about why you decided to move back to another cheat, it would be much appreciated.

Here you go, my experience using this cheat:

- not the prettiest looking menu
- horrible esp scaling
- rubberbanding esp
- the visual check on aimbot sometimes doesn't register when a player is peeking from stairs and such (which means it's heavily unreliable)
- sometimes doesn't register my keypress when I try to use both aimbot and triggerbot at the same

time (not set on the same hotkey, different)

- the rcs is too much and gives the user no control of their mouse
- the overall performance of the cheat is very sloppy (and you can't blame it for being external, I can name great performing cheats that are external)

Honestly, if you are going to sell a product for the price you are asking for, you should come out with a polished product, this feels like one of those early access Steam games that lie to their players and never give a finished product. I'm not going to be an asshole and chargeback, but this was one of the most horrible experiences I've had with an external cheat. I'm not a "internal is better" person either, and this is just a bad example of a sloppy external cheat.

A typical answer with no credible arguments. A little tip, the way you speak as a salesman/support to me, a customer, reveals how unconfident and unprofessional you are about your product. I would've at least respected your project if you were willing to fix supposedly 'my' problems (that's how you, the salesman, put it), but no, just belittle what I said with, "I have had hundreds of customers over the years," like I'm supposed to believe everything you say. Even if I give a hundred answers I'm afraid you'll just use the same excuse to sell a very low quality cheat.

Please try to be a better human, and at least show visible efforts in updating this undeveloped cheat before selling it overpriced. For the same price, I'd use BSS anyday, anytime.

I have private messaged you

Cheat has been patched for the latest csgo update.

D?ceived - August 5, 2018, 7:37 am

5 slots opened and a small bug fix pushed

zDk - August 6, 2018, 8:39 am

I purchased this a few months back and the discord channel just disappeared a few weeks back.

Can you PM me a way to get in contact with V9, he doesn't have open DMs on Discord?

D?ceived - August 9, 2018, 3:02 am

Server is back up after a few hours of downtime. We apologize for any inconveniences!

SuicidelsAnOption - August 9, 2018, 6:20 am

JUst bought the produx and I am keep getting invalid subscsription I've pmed you about this but not respons yet.

Problem has been solved for OP!

SuicidelsAnOption - August 9, 2018, 8:31 am

Having a problem, cannot use the hack.
Clicking on INS still not working.

L0RE - August 9, 2018, 11:48 pm

Vouch for Deceived and V9. The cheat is amazing, and works smoothly! The aimbot is just so good and clean. Never been called out for walls or aim. Not only that, but he is kind and quick to respond to try and help you resolve any issues. GLWS!

I used cheats every match, if used correctly they are very human-like and can easily pass off.
Vouch! A+
Gold 4 with cheats lol

linuxmasterrace - August 15, 2018, 4:08 am

might as well just make a paste?

D?ceived - August 15, 2018, 5:38 am

Ok, thanks for sharing I suppose ?

D?ceived - August 18, 2018, 11:38 am

Couple of slots just opened up!

int main() - August 19, 2018, 12:49 am

Bought a programming lesson to further expand my reversing skills and I could not be more satisfied for the price.

I wasn't wrong when I thought the dev knew what he was doing, glws.

Nevahr - August 24, 2018, 9:49 am

SUPER SUPER SUPER VOUCH FOR THIS GUY!

Is the discord channel still around? I'm looking to get back into CSgo and i used your hack before and loved it!

2Dank - October 28, 2018, 2:38 am

How do I contact you @Deceived??

D?ceived - November 4, 2018, 1:11 pm

V9cheats has had a major update, completely recorded and now with 0 bugs!
