Thread: [Best Pay-per-crypt service for LuminosityLink? Ready to pay BTC.](#)

3thicalnoob - February 14, 2017, 2:14 am

Hey folks..

I've been using CyberSeal protector with LuminosityLink all these days. But it eats away alot of time just to try different .icons and assembly, roughly it takes 1-2 hr everyday trying different executables. I'm sick and tired of it.

I tried various Online Crypting services, where they charge per crypts. But LuminosityLink fails to work with them. Can any one suggest a decent working service that is compatible with LuminosityLink RAT? or can any one crypt my exe everytime? I'm ready to pay per crypts. I'm not looking to buy crypter, but crypting service.

Please drop your suggestions.

I managed to get my one down to 2/35 with cyberseal in a few minutes. If I went on for another few, I could have probably gotten it down to 1/35.
