Thread: [Scammed by Verified Twitter uid=2932786 - Stole my Verified Account Twitter Account](#)

Mark Zuckerberg - February 14, 2017, 4:18 pm

Username: TuZick

User changed his username to: Verified Twitter

UID: 2932786

Profile Link: <https://hackforums.net/member.php?action=profile&uid=2932786>

So I contacted this user regarding his thread about unlocking locked Twitter Accounts seen here: <https://hackforums.net/showthread.php?tid=5527357>

Screenshot in case he deletes it: <https://i.imgur.com/7Uve56m.jpg>

A few weeks later he hits me back up saying he could do it. I give him the account details to my account that I need unlocked. He said he'd do it for free for me since I was the first one to hit him up, so it'd be a vouch copy of the service.

I figured theres no one someone scams on a vouch copy.

Obviously I was wrong.

The entire deal was on site as seen in the PM screenshots below:

<https://i.gyazo.com/fa47591c50a229636007c55e6cbabd5a.png>

<https://i.gyazo.com/f962d47d58dc08b697f9deeb21b125fe.png>

When he gave me the account he said he had to reset the password to the email on the account through outlook support, at that point I was really sketched out, even if I changed the email on the account he'd still be able to recover it.

So then this morning I woke up and the account was recovered, he blocked my other account that I had followed on it, and he changed the profile picture.

I did PM him multiple times, he read them but never responded for obvious reasons.

So yeah, don't deal with this user, first time I've ever seen a vouch copy scam report before... But apparently people really do go that low to scam!

Thanks for reading don't, deal with this user!

Update: User PM'd me saying he was holding the account ransom for \$50

<https://i.gyazo.com/f4d35214e6bded398a3b2ed21c70f05b.png>

Update: User just PM'd me saying he was going to give it to me for free until he found out he was getting no sales so then after he gave me the account he wanted money for it, but since I didn't give him money he took it back:

<https://i.gyazo.com/8944ce6a8106d4b23b578f1d9129ad37.png>

Update: User PM'd me again saying he will not give me the account unless I pay him the \$50.

<https://i.gyazo.com/7c528ad7b4fd00fe96ead629ba3b9529.png>

UPDATE: User changed his username to: Verified Twitter

UPDATE: User is now raising the price to \$75 for the ransom.

Sucks to see you get scammed. What makes it worst is that it was a vouch copy lol.

Also I checked his rep and he has many open reports and negs related to scamming.

Like I said before I got into a car accident, had to put all my money into fixing my shit car.

Don't say something is free and then expect someone to pay for it. And then get angry when they don't.

Wow.

Surely that vouch copy would have helped you with your sales etc. Hopefully you two resolve it. It's not worth fighting over petty stuff.

I cant tell you not too, thats really up to you. Its kinda dick-ish, but again up to you.

Also he only wants BTC, so I can only assume he's going to scam. After doing some further research he has a history of refusing to use middle men, so thats a thing too allegedly.

Im sorry but the irony of his name makes this soo much funnier but looks legit and I do hope this gets resolved.

?Synapse - February 14, 2017, 6:13 pm

I initially thought this was his attempt at charging you after verifying your account to which you could have easily said no, but scamming a vouch copy of your own account... HF deals have turned into a meme

Anyway hopefully you get your account back.

Just to clear something up in case its misunderstood, he wasn't verifying the account itself, it was already verified, it was just security locked by twitter so he said he'd unlock for me.

But other than that, yeah he said it was a free vouch copy of his service, then he gave me the account after he unlocked it, then didn't give me the OG email, then I woke up and the account was recovered by him, no surprise there.

Yeah, I thought he actually verified a fresh account for you and now he's revoking it unless you pay, in that case you'd be losing nothing so I was wondering what this was about. Then I realized he was holding your previously verified account for ransom.

Looks legitimate and a loss for a vouch copy to OP.
Hope he resolves this if he doesn't want consequences.

Also would like you to update the deal dispute db since he still looks clean on there.

Refusal - February 15, 2017, 7:56 am

Vouch! What an idiot! Kid straight up stole your twitter. The struggle must be real when he is demanding \$50 for a service, he said he would do for free as a vouch copy.

If the child wanted money for his service from you, he should have stated that before he got your account details from you.
