You guys getting red/blue or black? If not getting either, which do you think is more attractive?

I've got the neon red/blue switch on preorder, and I'm planning to get regular grey later in the year.

I like the asymmetry it gives, and to get that particular colour scheme, you'd have to buy red and blue pairs separately. I'll probably be mixing them with the grey.

Nice. I didn't even think about having to buy those separately. Maybe I'll get the same. I haven't pre-ordered so I'm hoping there'll be some systems available around day 3 xD

I like Neon over the regular just because its something different. I have a couple neon on pre-order i'm looking forward to.
