Thread: [Flashing Keyboard - The best Thing you will ever see!](#)

999 - July 20, 2010, 12:35 pm

Im probably not the owner of this guide and i never said i am , im just posting this for people.

This is going to make your Keyboard lights (Capslock,Scrollock,Numlock) flash.
It looks pretty bad ass.

Instructions :

1. Open notepad and paste this code into it :

```
Quote:Set wshShell =wscript.CreateObject("WScript.Shell")
do
wscript.sleep 100
wshshell.sendkeys "{CAPSLOCK}"
wshshell.sendkeys "{NUMLOCK}"
wshshell.sendkeys "{SCROLLLOCK}"
loop
```

2. Save it as anything.VBS

3. Run the file. Enjoy , Dont have a seizure!

To remove:

Open task manager and end the process. Its called something like WSCRIPT.

Enjoys.

Arete - July 20, 2010, 12:42 pm

No internal damage?

I'll give it a try.

WoW ThiS IS Cool Lol.

999 - July 20, 2010, 12:44 pm

Hey mate , no damage

Open task manager and end the process. Its called something like WSCRIPT. to turn it off :)

MouseDesign - July 20, 2010, 12:48 pm

Works like a butterfly. Pretty cool. I have a G18 keyboard, think you can do the same with these buttons? Like switch the lights on and off? ;o

999 - July 20, 2010, 12:51 pm

(Jul 20, 2010 12:48 PM)Judge. Wrote: [\[CITE\]](#) Works like a butterfly. Pretty cool. I have a G18 keyboard, think you can do the same with these buttons? Like switch the lights on and off? ;o
Im not sure about that :P

MouseDesign - July 20, 2010, 12:54 pm

G15 keyboard I mean* think you can come up with something for that? (:

http://www.google.be/imgres?imgurl=http://farm1.static.flickr.com/197/486320813_9a0bc38197.jpg&imgrefurl=http://www.flickr.com/photos/williamhook/486320813/&h=375&w=500&sz=148&tbnid=RiDbiime-cJM9M:&tbnh=98&tbnw=130&prev=/images%3Fq%3Dg15%2Bkeyboard&hl=nl&usg=__yKO5_JrJLELHXPJqtO2zC8PSsYc=&sa=X&ei=Hv9FTMDZHsuJsAbQ-sBx&ved=0CCAQ9QEwAg

Check that link, it even has a small box with explanation marked where the light button is. I'd adore you if you could.

zLBannedLz Riots! - July 20, 2010, 12:57 pm

lol thats pretty cool im sending the script to my RATS lol lets see their reactions

Oreos - July 20, 2010, 1:01 pm

iTS pREtTy coOI But wRiTing gETS fUcKed up WhEN YoU Use It=I

Thanks , yeah it is pretty nice :)

999 - July 21, 2010, 6:12 am

Did anyone else try this :)?

†The Púnîshert† - July 21, 2010, 9:48 am

LOl this could be a nice prank

999 - July 21, 2010, 9:53 am

(Jul 21, 2010 09:48 AM)haxorpro Wrote: [\[CITE\]](#) LOl this could be a nice prank
Yeah and imagine combining this with the talking virus thing :)

Roy?? - July 21, 2010, 10:14 am

pretty cool, but my laptop only has a light on CAPS which flashes. I do like the talking virus idea tho.

999 - July 21, 2010, 10:16 am

(Jul 21, 2010 10:14 AM)omgroy Wrote: [\[CITE\]](#) pretty cool, but my laptop only has a light on CAPS
which flashes. I do like the talking virus idea tho.
Theres a VBS thing like this but it talks

999 - July 21, 2010, 11:45 am

Anyone else tried it :)?

tyy.

InuyashaITB - July 21, 2010, 11:48 am

this is pretty cool :P

but a thing to remember is how to turn it off :P

just go to the processes tab of your Task Manager and end the WSCRIPT.EXE process.

999 - July 21, 2010, 11:58 am

(Jul 21, 2010 11:48 AM)InuyashaITB Wrote: [\[CITE\]](#) this is pretty cool :P

ReFuel - July 21, 2010, 2:51 pm

Ehh i was stupid enough to test it out with the letter "C". baaad idea...

'Snorlax - July 21, 2010, 3:03 pm

Old as internet.

WinAmp (Music program) got a capslock-numlock and scrolllock music equalizer addon.

It's pretty cool.

I got an old keyboard, took it apard and attached like... 50+ LEDs to it, and it played to the music.

I still got it :3

Also: <https://hackforums.net/showthread.php?tid=199998>

(Jul 21, 2010 03:03 PM)Snorlax Wrote: [\[CITE\]](#) Old as internet.

It's pretty cool.

I still got it :3o , i want a keyboard with 50 LEDs , that would look so sweet.

wow this is cool thanks :D

this is cool!.. hahahah.. flashing LED..

haHAH ItS AwEsOME:p I LOVe IT!

How Do i turn iT OFF LULZ :p?

[illegible]

TRIED, lol fucking amazing :D

eXauST - August 7, 2010, 1:58 pm

yep works like a charm, Loks great any way to mkae it for your mouse aswell? My mouse has liek 5 different colors, all different motions when you do certain task.

icemanwillis - August 7, 2010, 2:33 pm

Hey I tried this, couldn't get it to work.. I'm lookin at it off my cell and typein it at work. Do I have to write it exactlly as it show's like caped letters and all? And is it all one long string or do I space it? Thanks. I did write it like it show's and saved it and double clicked it to run, it would flash the command box but never do anything thanks to all

Turnt - August 7, 2010, 2:45 pm

It wAs PRetTy fUn untilL My kEyBOarD CaUght ON flrE...

Montana" - August 7, 2010, 3:12 pm

Pretty nice, maybe handy for some virus or something.

IsraX0r - August 7, 2010, 4:38 pm

1 problem with that, you can't chat or anything because it keeps pressing on Caps Lock.

Nice idea though.

bazda_hacker - August 7, 2010, 5:02 pm

That's cooll , i like it

too shoorrtrtt

avidhacker - August 15, 2010, 10:04 pm

awesome work broo..its just lightning hahaha

bumber - August 16, 2010, 2:17 am

anyone know what these "codes" are called, like the CAPSLOCK how could you make it do the volume buttons on a laptop or that g15...is there anyway to look it up or is that all keyboard side, not "machine code"?

```
Quote:Set wshShell =wscript.CreateObject("WScript.Shell")
do
wscript.sleep 111
wshshell.sendkeys "{CAPSLOCK}"
wscript.sleep 222
wshshell.sendkeys "{NUMLOCK}"
wscript.sleep 333
wshshell.sendkeys "{SCROLLLOCK}"
loop
```

That's one i was messing with, each sleep command changes the speed of the flash...i think its time the light is turned off in milliseconds ? You cant use a zero unless you copy paste it for some reason ?

Im thinking there is a {command} for each light, but im not sure. So the whole script would be much longer. Or can you do like {NUMLOCK, SCROLLLOCK} ?? (edit that doesnt work)

Im looking stuff up as i think about it, but could you do like the system beep too? Make it a full blown techno party ?

tehwezz - August 16, 2010, 3:20 am

tHIS Is prEtTY cool :P

i HAVE CANyoN keyboarD.

without sleep, my computer almost crashed.

Bansil - August 16, 2010, 3:27 am

Haha awesome share man!
Thanks!!

bumber - August 16, 2010, 8:21 am

you can add in a wshshell.sendkeys "%B" line and it will give you the deeper tone "bloop" sounding beep, like when you click something that doesn't work or whatever. It's not exactly the sharp system beep...but it's a start. I think you can use a couple commands to get the bloop sound, I think you just use an invalid command and its an error tone.

DaKnOb - August 16, 2010, 8:26 am

What this thing does is to press Numlock/Capslock/ScrollLock again and again.
Try to open this and write a text using both keyboard and numpad. xP

WTFMUCH - August 16, 2010, 8:41 am

Lol ThIs iS SO SupEr cOol =D

Fetus Flipper - August 16, 2010, 9:24 am

It's not working for me.): Maybe because I have a Dell Inspiron.

BguyTheKing - August 16, 2010, 10:33 am

its cool but still looks odd

ACCOUNT - August 16, 2010, 11:01 am

This was in a old rat called "Let my Rule" (or something like that) I cant find it, but I got it from a torrent. It was a pretty funny rat. It was just to use to mess around with, nothing else.

999 - August 16, 2010, 4:12 pm

Wow this is so sweet! I haven't been on HF in a while and last time i checked it was at page 6!!
Sweet guys , thanks for the feed back :)

last.click - August 16, 2010, 5:18 pm

i changed yours around a bit, not sure if posted,

```
Set wshShell =wscript.CreateObject("WScript.Shell")
do
wshshell.sendkeys "{CAPSLOCK}"
wscript.sleep 50
wshshell.sendkeys "{NUMLOCK}"
wscript.sleep 50
wshshell.sendkeys "{SCROLLLOCK}"
wscript.sleep 50
loop
```

Nubby - August 16, 2010, 6:20 pm

thank you so much
very funny
thank you

mefe - September 8, 2010, 4:05 pm

ROFL... this is great, are there any other harmless things i can run off a flash drive in my tech class?

today we were talking about how people can turn on laptop cameras and watch you whenever they want with ought you knowing... naturally my genius grade class mates argued... THERES A LIGHT THAT GOES ON... I shall put this on there comps before class, should prove a point.

well... any thing else thats like this.. fun and sage?

Tiwoodsta - September 8, 2010, 6:24 pm

clears throat like i said before what does this do?

Vesan - September 8, 2010, 10:50 pm

Haha. That's pretty good trick dude. And Tiwoodsta you know how you press Num Lock, Scroll Lock or Caps lock and a little light comes up? It flashes all those lights. Some keyboards there is no light that comes up. It's basically turning on all the caps lock, scroll lock and num lock and turning it off

really fast and continuously.

Maasie - September 9, 2010, 9:47 am

Just a question (and a secret ;D), could you do the same with a webcam with a light? Like turning it on/off/on/off. And another question, i have a Toshiba Satellite, it has some kinda command thing next to the power button. Pressing the mute button turns the lights on them on and off. Could something be made with that too?

Image from board, next to power button and speakers:

Spoiler ([Click to View](#))

Desiderius - September 9, 2010, 9:53 am

This is soo old, why do u get rep of this? -.-

Cyb3r_Hack3r - September 9, 2010, 1:15 pm

Hahahah, great trick man xD

Punchroll - September 9, 2010, 2:24 pm

omg hahhaha, that was fun :D Couldnt find the process though, so i had to restart pc, but still, EPIC!

999 - September 9, 2010, 3:27 pm

Thanks for liking it guys :)

(Jul 20, 2010 12:35 PM)999 Wrote: [\[CITE\]](#) Im probably not the owner of this guide and i never said i am , im just posting this for people.

This is going to make your Keyboard lights (Capslock,Scrollock,Numlock) flash.
It looks pretty bad ass.

Instructions :

1. Open notepad and paste this code into it :
2. Save it as anything.VBS
3. Run the file. Enjoy , Dont have a seizure!

To remove:

Open task manager and end the process. Its called something like WSCRIPT.

Enjoys.

What about this?

MFX - October 5, 2010, 1:58 pm

I made this. Basiacly you can made thousanzs of differents if you just understand the code...

```
Code Set wshShell =wscript.CreateObject("WScript.Shell")
do
wscript.sleep 100
wshshell.sendkeys "{NUMLOCK}"
wscript.sleep 500
wshshell.sendkeys "{NUMLOCK}"
wscript.sleep 100
wshshell.sendkeys "{CAPSLOCK}"
wscript.sleep 500
wshshell.sendkeys "{CAPSLOCK}"
wscript.sleep 100
wshshell.sendkeys "{SCROLLLOCK}"
wscript.sleep 500
wshshell.sendkeys "{SCROLLLOCK}"
wscript.sleep 100
wshshell.sendkeys "{CAPSLOCK}"
wscript.sleep 500
wshshell.sendkeys "{CAPSLOCK}"
wscript.sleep 100
wshshell.sendkeys "{NUMLOCK}"
wscript.sleep 500
wshshell.sendkeys "{NUMLOCK}"
wscript.sleep 100
wshshell.sendkeys "{NUMLOCK}"
wshshell.sendkeys "{CAPSLOCK}"
wshshell.sendkeys "{SCROLLLOCK}"
wscript.sleep 500
wshshell.sendkeys "{NUMLOCK}"
wshshell.sendkeys "{CAPSLOCK}"
wshshell.sendkeys "{SCROLLLOCK}"
wscript.sleep 400
wshshell.sendkeys "{NUMLOCK}"
wshshell.sendkeys "{CAPSLOCK}"
wshshell.sendkeys "{SCROLLLOCK}"
wscript.sleep 500
wshshell.sendkeys "{NUMLOCK}"
wshshell.sendkeys "{CAPSLOCK}"
wshshell.sendkeys "{SCROLLLOCK}"
loop
```

And thanks for the +REP :)

punish3r - *October 7, 2010, 4:24 am*

Thanks Man GoodJob ?

999 - *October 7, 2010, 4:43 am*

No problems , BTW 200th post woot. :)

10mintoday - *October 7, 2010, 5:49 am*

i try it, this is amazing... thanks :)

MiND C0re - *October 7, 2010, 6:26 am*

:), its a simple script writted using VB script language .

nice , and useful for crackers to "crack" their names like that :

MiND iS tHe B3sT , EnJoY :P

and btw it doesnt damage your computer or something its safe .

| ZooT | - *October 7, 2010, 7:08 am*

Thank you, this is the best thing I have ever seen...

Emilie - *October 7, 2010, 7:15 am*

Haha. It works and its so cool :D

999 - *October 7, 2010, 7:49 am*

Haha glad you guys like it

Night Shade - *October 7, 2010, 8:02 am*

Its so awesome I just jizzed all over the flashing keyboard =D

999 - October 7, 2010, 8:05 am

Green applez [+rep] make me want to jizz over my flashing keyboard. its just like porn.

WhoTFCares - October 7, 2010, 9:57 am

HaHAHA wRiTInG Is tOtALLY FUcKeD up Man LOL IMaO

CursedPX - October 7, 2010, 11:28 am

Keyboard like Disco..

xAxax ! Thank you

999 - October 7, 2010, 12:11 pm

This is going to make your Keyboard lights (Capslock,Scrollock,Numlock) flash.
It looks pretty bad ass.

Instructions :

1. Open notepad and paste this code into it :
2. Save it as anything.VBS
3. Run the file. Enjoy , Dont have a seizure!

To remove:

Open task manager and end the process. Its called something like WSCRIPT.

Enjoys.

dude u forgot to mention that it works on same way it would work if i am presing scroll,caps and numlock continuously so if u gonna leave keyboard iddle its ok,but if u plan to write something dont use it srsly....

JOW - January 12, 2011, 9:09 pm

works pretty good i did it on my sister's computer and told her she has a virus lol she started tripping
haha good share man

999 - January 13, 2011, 12:15 am

Lol, cool trlck bUD. VErY fUN :)

bx bugs - January 25, 2011, 9:32 pm

(Jul 20, 2010 12:48 PM)Volenar Wrote: [CITE](#) Works like a butterfly. Pretty cool. I have a G18 keyboard, think you can do the same with these buttons? Like switch the lights on and off? ;o

If this question hasn't been answered yet, yes you can do it for every key, just recode the code he gave you. Like this:

wshshell.sendkeys "{K}"

and list every letter/number you want. I can't try it to see if it works because I don't have a G18 keyboard but you can give it a try :) .

999 - February 7, 2011, 7:52 am

Uncle Pillow - March 2, 2011, 10:47 am

I liked this so much on windows that i wanted to bring it to my ubuntu install. The only difference is

that this one flashes the lights individually

gotta run it as root though

Code `#!/usr/bin/python`

```
import fcntl
```

```
import os
```

```
import time
```

```
KDSETLED = 0x4B32
```

```
SCR_LED = 0x01
```

```
NUM_LED = 0x02
```

```
CAP_LED = 0x04
```

```
dev_Console = os.open('/dev/console', os.O_NOCTTY)
```

```
numlock = NUM_LED
```

```
caps = CAP_LED
```

```
scroll = SCR_LED
```

```
"all_on = SCR_LED | NUM_LED | CAP_LED"
```

```
all_off = 0
```

```
while 1:
```

```
    fcntl.ioctl(dev_Console, KDSETLED, numlock)
```

```
    time.sleep(0.5)
```

```
    fcntl.ioctl(dev_Console, KDSETLED, all_off)
```

```
    fcntl.ioctl(dev_Console, KDSETLED, caps)
```

```
    time.sleep(0.5)
```

```
    fcntl.ioctl(dev_Console, KDSETLED, all_off)
```

```
    fcntl.ioctl(dev_Console, KDSETLED, scroll)
```

```
    time.sleep(0.5)
```

```
    fcntl.ioctl(dev_Console, KDSETLED, all_off)
```

```
    time.sleep(0.5)
```

999 - March 21, 2011, 3:55 pm

putting this back up to the top , STAY ALIIIVE!

iamback1 - March 21, 2011, 4:19 pm

lol i tried it and im new to this forum nice:p

Stefenatefun - March 21, 2011, 6:43 pm

This is the best thing that I have ever seen, thank you very much for finding this out, what's the code to make them light up individually? It'd be awesome to do this kinda stuff all the time :P or hacking.

Maxwellz2 - March 21, 2011, 9:17 pm

fucking amazing XD

#toofuckinshort

domo-kun - March 25, 2011, 9:33 pm

This is sick!!! Nice share(: makes me interested in VBScript. Haha I'm going to do this to school computers when i come back from spring break. It'll be hilarious because task manager is disabled on the computers at my school.. XD

Jaxon - March 25, 2011, 9:49 pm

thats really neat. thanks for the post :D

Lemmiwinx - March 25, 2011, 10:26 pm

Tried this. Kind of cool, thankyou :D

Root Command - March 25, 2011, 10:28 pm

nice tutorial..might get into this :)

Cangks - March 26, 2011, 2:12 am

pretty darn cool! i've just pranked my little brother using this!

STmAos - March 27, 2011, 1:39 am

Works, and looks so cool! :D

but one thing i noticed is that my mouse gets really fidgety. Then again im using a laptop, im not sure if that would have anything to do with it but it just might. has anyone else noticed this? It could be just my computer that does it. But cool post thanks man!

999 - March 27, 2011, 3:16 am

Hmm , i don't know. I've never tried it on a laptop so i can't help you sorry.
and thanks :)

ChilliBeefSausage - March 27, 2011, 4:17 am

Doesn't work for me aha. I've had it working in the past.

toxicangel91 - March 27, 2011, 5:45 am

wow i like it ... \m/ ... :D

deadfire55 - March 27, 2011, 7:38 am

There's a plugin to make it sync with the bass of music, look it up for WinAMP.

Revolutionize - March 27, 2011, 7:43 am

It doesn't work for me :(?

qwerty156 - March 27, 2011, 7:46 am

This is how it Types dEpeNdoNg On YOUr TypiNg SpeEd!

STmAos - March 27, 2011, 11:04 am

Tainted Star - July 28, 2011, 11:32 am

Not working for me , instead it bugged my Caps Lock.

Had to "End Process" it.

Any ideas for a wireless keyboard ?

Wheelz - July 28, 2011, 12:25 pm

lol ITs sO much fUN To usE tHiS, lOI

gkrmelj - July 28, 2011, 12:59 pm

this is ok, but theirs also a plugin for winamp which will do the same only with the beat of the music :P

??s?? - July 28, 2011, 1:48 pm

LOl tHiS IS rEaLIY COOL. tHanKS fOr ThE share MAn. :D :D :D

Burn™ - July 28, 2011, 3:49 pm

wow thanks mate looks awesome :D

Xellic - July 28, 2011, 4:45 pm

HAhA pREtTY sweEt :D tHANKs fOr ThE sharE!

Rwkeith - July 28, 2011, 5:05 pm

you slr, aRe aWeSOMe. ThIs WiLL BE FuN

Dome - July 28, 2011, 5:12 pm

Lmao this is awesome :D Thanks :)

RongLongDong - July 29, 2011, 5:20 pm

A thing that builds on this would be my edit that makes it go in order making a moving effect.

PHP Code

```
<?php
Set wshShell =wscript.CreateObject("WScript.Shell")
do
wshshell.sendkeys "{NUMLOCK}"
wscript.sleep 100
wshshell.sendkeys "{CAPSLOCK}"
wscript.sleep 100
wshshell.sendkeys "{SCROLLLOCK}"
wscript.sleep 100
```

loop

hoLe[R]a - August 4, 2011, 8:06 am

Man, this is awesome trick !!! ? Is there a way to combine this with a message window without stop flashing the lights ? It will be great. Cheers !

microzee - August 4, 2011, 8:31 am

IT IS hIlLARIoUS to type. i Like this ONe the bEST:

```
Set wshShell =wscript.CreateObject("WScript.Shell")
do
```

```
wshshell.sendkeys "{NUMLOCK}"
wscript.sleep 500
wshshell.sendkeys "{NUMLOCK}"
```

```
wshshell.sendkeys "{CAPSLOCK}"
wscript.sleep 500
wshshell.sendkeys "{CAPSLOCK}"
```

```
wshshell.sendkeys "{SCROLLLOCK}"
wscript.sleep 500
wshshell.sendkeys "{SCROLLLOCK}"
```

loop

Django - August 4, 2011, 6:05 pm

wshshell.sendkeys "{NUMLOCK}"
wshshell.sendkeys "{SCROLLLOCK}"
wscript.sleep 50
wshshell.sendkeys "{CAPSLOCK}"
wshshell.sendkeys "{NUMLOCK}"
wshshell.sendkeys "{SCROLLLOCK}"
wscript.sleep 50
wshshell.sendkeys "{CAPSLOCK}"
wshshell.sendkeys "{NUMLOCK}"
wshshell.sendkeys "{SCROLLLOCK}"
wscript.sleep 500
loop
'if iAnswer = vbOKOnly Then
'End If
how Do I turn yoUrs oFf, THERE iS NO WScRipt.eXE runNING that I Can sEE IN My Task
MANAger
```

Edit: Nevermind, I found it. Very cool script though.
