Thread: [What Browser Do You Use?](#)

Elitas - February 15, 2017, 8:55 am

This question is based on computers only, idk what weird Asian browsers people have on their phones (mine included).

FireFox, Opera, Chrome, etc seem to be common ones.

Which one do you use most and do you use any irregular ones?

I used firefox all the time, but since it started to get laggy with recent releases, I tried out Microsoft edg(e)y browser and it works somewhat decent
