How did you lose it in the first place?

To be completely honest, It happened out of nowhere. Two weeks ago or so I went to bed. I woke up the next morning, tried to open my app and saw that I was logged out. I use keychain so all my info autofilled and I received the error message that my credentials were incorrect. I immediately realized something was up, I had someone that follows that account confirm that my bio was changed.

Did really you make a new account to reply to a post after a year and a half?
