Hey there,

Selling an advanced, unused and private YouTube takedown method.

The method allows you to take down pretty much any video, and keep them down indefinitely.

This method can also be used to completely take down YT channels.

-- I'm selling 2 copies of this for 100\$/BTC each --

I'll mentor you through the method and give you some tools to help you with it. Support is given aswell in case you're having problems.

-- ONE VOUCH COPY IS GIVEN --

User MUST have 1000 reputation or above and must be trusted.

I will not reveal information regarding this method, so dont ask.

So you send fake takedown claims or something else?

Go takedown a random channel as proof if you like

6-10 depending on a few factors, but if executed correctly it'll keep the content down.
