Can't really vouch for him as I haven't bought anything from him or do we know eachother. What can I say from the look on some of his past works that he is a very talented & experienced designer when it comes to vectoring. This guy always pays attention to details and shading, I can definitely recommend his services as I'm also a designer myself with years of experience and I'm certainly sure he will not disappoint you. :)

I asked that because I felt like their was no point on asking you to keep reworking it, I wasn't happy with the product, I paid you \$10 because I felt bad about the situation and would never fuck someone over because you put some effort into it. However I am leaving my honest review I am not going to sugar coat it and bullshit people telling the straight up truth and I hope you can accept and learn from it.

Huge huge vouch. Made me a userbar for another forum. Added him and he responded within the same day. Userbar got done within 72 hours of contact. Asked for little things to change and fix and he did the work quickly and proficiently.

After sending payment, he sent me the desired userbar and the PSD which I requested.

Motsura is a understanding, skillful, and cool GFX artist.

Would definitely recommend.

User went above and beyond. I personally didn't give him a good enough description of what I wanted as I should have and he still ended up making it exactly how I had pictured it in my head. Also took the time multiple times to make sure it looked right before making me pay, and didn't complain when I asked him to change it like 20 times lol. Fast, and high quality work, overall great experience and would highly recommend to anyone looking for high quality graphics at a low price!

Vouch, made me a logo! It was really good

Social Engineer - December 3, 2017, 4:19 am

Just had the pleasure of working with Motusora. I told him exactly what I wanted and he had a sketch ready much quicker than I expected, exactly how I asked him and there was only one minor change required which was sorted within minutes. It was quite late (around 1am) so he went on to complete the logo the following day; MUCH quicker than I expected. I thought it would have taken atleast 2-3 days but I had the logo in less than 24 hours and that's including the time he slept.

Would definitely use again and would definitely recommend for others to use.

Thank you sir for your services.

Vouch for Motusora for making me a avatar! He created my requested avatar in two days and it is very detailed and HQ. Everything is made by him and he is probably the most affordable and expert graphic maker you can get in HackFourms! Motusora is very friendly and convenient when it comes

to communicating with his clients such as myself and I am very satisfied with his service and hope to deal with him again. As maybe I would need another work such as a YouTube banner and such. Anyways I wish you the best and I highly recommend hiring Motusora if you are looking for a high quality graphics maker. Best of luck and good luck with sales!

My review/feedback -

As a hobby i am creating a prototype game for an idea i have and being useless at art i came to seek help. I have never really requested art before so i was not really sure what to expect or give as an idea to what style i want. Op was friendly enough to point me to some images for some styles and i picked one.

The result that i was given was way beyond what i expected it to look like! I fell in love with the style right away and it just looks sweet! I need a couple more things making and i will for sure be using motusora again!!

Highly recommend this talented individual!

Price - Reasonable(maybe a bit more than i wanted to pay) / Communication - Great / Art received - Awesome

As a hobby i am creating a prototype game for an idea i have and being useless at art i came to seek help. I have never really requested art before so i was not really sure what to expect or give as an idea to what style i want. Op was friendly enough to point me to some images for some styles and i picked one.

The result that i was given was way beyond what i expected it to look like! I fell in love with the style right away and it just looks sweet! I need a couple more things making and i will for sure be using motusora again!!

Highly recommend this talented individual!

Price - Reasonable(maybe a bit more than i wanted to pay) / Communication - Great / Art received - Awesome

Awesome and super fast service. Received my first design within 2 hours of payment and then after many revisions got my final logo within a 24 hour timeframe, and the logo itself is something you would pay much more for than what he's charging. I would definitely recommend this service to anyone looking for high quality graphics :)

Always always always love leaving a vouch for my guy ! Second signature i've purchased so far; came out amazing once again.

OP is extremely easy to work with. As I stated last time; he even sends previews throughout the duration of creating the graphic. So you'll always know how its going, and even ask for changes if needed ! I know I personally ask for a lot of shit; im very indecisive. OP still worked with me sending preview after preview until we got to what we were going for.

Always a vouch for OP.

Another HUGE vouch for my man Motusora. I will always send anyone and everyone who ask for
any type of GFX work this way.

If you didn't already know; he created my flashy ass avatar ;) ; as well as basically EVERY
signature i've had throughout the site. This most recent GFX work was for a business project. I had
requested a cover page and a logo for a company; with tons of quick minute changes. He was able
to send me multiple previous; and we had the final product done under 24 hours.

I'm not sure if the thread owner is the same person that I was in contact with on Skype, it's possible

that OP is delegating tasks to several designers.

My experience has been terrible, communication seemed to be extremely hard and ultimately I wasted 5 days. Note: OP did refund the payment.

This is the quality I expected judging by his portfolio:

Spoiler [\(Click to View\)](#)

This is the first iteration of the logo that was sent to me:

Spoiler [\(Click to View\)](#)

I clearly told him to improve the logo design, specifically the book. Instead, I got a new logo:

Spoiler [\(Click to View\)](#)

I once again told him to go back to the previous design and improve it.

Instead, I got a new design:

Spoiler [\(Click to View\)](#)

a day later, a new design...

Spoiler [\(Click to View\)](#)

and a new design...

Spoiler [\(Click to View\)](#)

and a new design...

Spoiler [\(Click to View\)](#)

Every single day, I told him to iterate on the first design that was sent to me, and he acknowledged what I wrote only to deliver a new concept.

Honestly, even though he refunded and offered to send me the .AI files for the logos, it doesn't

mean anything when I strongly suspect that there are a bunch of different designers (virtual assistants) working on those logos.

you're one of the dumbest guy i ever knew .

who would think that a background is part of the logo ?

the only thing i did is the LOGO you piece of shit , while that background is obviously downloaded
from internet for logo presentation.

that would be my fault if i sold that background image and claim as i took that photo myself but not,
i only sold a fucking logo ?

and hey , my logos are fucking ORIGINAL you uncultured swine ?

edit: also your mate already admitted his mistakes

(Jan 29, 2019 03:57 PM)Quick Hit Wrote: [\[CITE\]](#) I provide replications of existing
clothing,necklaces,phone cases etc when the client is looking to get the exact design which is
placed on a already existing shirt on a specific store and wants to use it himself to put it on his store
that's totally different. I do not claim that it is 100% original when you copied something from the
internet.

I just indicated that you also use stuff from the internet yourself, and claim that you do not and
criticise other graphic designers for doing so, if you didn't go on other people's threads insulting
them cause they used a free vector or a background available on the net and edited it and added in
some basic text I wouldn't have posted my comment.

The fact that you are qualifying my graphics as LQ and Neg repping me (-4) for exposing this just
prooves that you're mad that people discovered that you're also copying and using free vectors.

no, i've never exposed anyone for using a free background image , but i exposed someone for
ripping logos from internet .

i negged you caused for being LQ , cause you think i only put a pre-made logo on a background .
and a 3 minutes job ? LMAO

and mostly, that's an insult to us illustrator if you just go around replicating things which is not even
made by you in the first place ?

How much will it cost to create a vector design from a photo that I will give it to you. I will basically give you 2 photos with 1 people on each. You will need to combine them and create a vector design. Please let me know.

Made me a shitty thread that I never liked and then tried to charge me \$30 (same price I paid for the thread) to change two words on the thread and add contact information.

Offered him \$15 since it was literally less then 5-10 minutes and he told me to go do it myself lol.

Can also never understand this guy 75% of the time due to his broken english

Bought a graphic design from Motusora and I'm very happy with the results, the price was good and the delivery fast.

I needed an adjustment in the text (My own fault) and he fixed it right away.

From now on I will contact Motusora for future designs as well. Will rate the service a 10/10 and definitely would recommend.

Hey, I'm in need of a graphic. (Twitch icon to be exact.)

Can you do some sort of custom cutesy looking character (a cute elephant maybe?) with
"Nick0901" below it?

What would the cost for this be? Thanks!

I think im a demanding customer. But Motusora, always blows me away with the dedication to his craft. if he says, it wont work i dont even question it. he knows how to handle all the nuances and make it LOOK good above all. If you have a vision, Come here. Motusora will take that concept and make it a reality. It MAY not be EXACT in EVERY detail, but it will be BEAUTIFUL and what you want, you just may not know whats even better!

You want a great designer, great artist, great price? This is where you stop looking! Motusora is you man.

This guy is the best! I gave him 2 examples of what 'HF avatar' I wish to get and he nailed it.
For only \$25 he designed a few drafts for me, asked what I preferred to get and made it till the art work it is today.

Communication on point, and of course a very well designer. Thank you so much my man.

I've been buying artworks in my life, have never received something I could compare to what Mot have done for me.

Perfect logo, looks dope!

Also had a misunderstanding with him at the start (it was my bad), the guy accepted to remake the whole work and was nice and gentle to me although I had made a mistake.

Thank you Mot, if I ever need anything you're my guy!

Huge vouch for OP. Purchased a whole graphics package from him. Probably the greatest quality graphic designer I've ever worked with. I didn't really give him many examples to work with and kind of left him in the dark, but he managed to execute quality designs even though I kept asking to change things. Would honestly recommend Motusora to anyone, he does great designs at really good prices and will work towards your requirements no matter how frustrating the process may be. In the end, I'm more than happy with what he created. Thanks again. Big vouch.

I needed a logo and was quoted \$65 USD, and I'm happy with the end result. There was quite a bit of back and forth; and it's important to remember that you need to have an idea of what you want and that you do push for certain ideas/aspects of the logo as he's not a mind reader - he will just do what you want.

I do recommend and am using my logo now :)

Motusora has successfully completed a thread design and animated signature for me and I am very satisfied. I definitely got my money's worth. I appreciate his patience in fine-tuning everything and making the small changes I was after. The thread design is much nicer to look at than BB-coded text and the animated signature should draw attention for potential customers. I'd recommend his work, given what he charges.

I just got a logo made from Motusora, it only took him 3 days to, first draw then design the logo. It was a perfect logo for what I needed and I couldn't have asked for a better job. In addition to the previous work, I had placed an additional small order for a few more emotes that I missed out the first time.

His service has been exceptional and his artwork and GFX work are to my absolute liking. It was fast and conversing with you about my ideas was very easy and to-the-point. It was very pleasant working with you again and I'll be coming back shortly with a much bigger order. Until then, I'd like to vouch for Motusora - he won't disappoint you. So, please feel free to use his services for any GFX work that you may have.

~ Regards, Wolf.

Just had Motusora complete a few assets that I needed for a game I'm making. Not only did he deliver the graphics really fast (over 8, detailed characters within 3 days), they were all extremely good quality & all my friends love them.

Motusora was also kind enough to send me sketches and keep me updated throughout the entire process of making all these graphics!

Huge vouch!

Motusora's Hand Drawn Graphics Design Review

Quality: 10/10

Motusora's quality of work will not disappoint, there are intricate details and things you won't even realise are there until you take a second look and stare in disbelief as the amount of attention and skill far exceeds the affordable price range.

Design: 8/10

Motusora's designs seem to turn your idea or concept into something of a fairytale, the way he is able to capture your concept to the finest detail with almost no references needed, both orders from

Motusora have both mesmerized me as I look upon the finished product as if it was plucked straight from my mind and given a well designed makeover.

Delivery: 10/10

Motusora's delivery time is excellent, it is amazing how fast he can deliver a mock design/finished product within the time that he does considering the fact that the designs are hand drawn. Upon both times I have ordered they have always arrived in a respectable and acceptable amount of time from order to customer. As I am an impatient person regarding such things, Motusora definitely has patience with giving updates etc, just don't hassle him too much.

OVERALL REVIEW: 9/10 now stop reading this review and just order, you will not regret it.

Motusora did some art work for me recently, and I'm happy with results of what he created. Gave him examples of what I was looking for, and he put together a nice drawing by hand. Happy with the experience.

Here's a recent logo concept I created for BITROID.

The logo combines a modern "B" monogram with pixel elements to symbolize bits.

A subtle detail in the icon is that the upper portion of the "B" resembles the side view of the Android robot mascot, creating a visual connection to the brand's Android-focused services while keeping the design clean, distinctive, and memorable.

Stanley - October 14, 2026, 2:23 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
