Thread: [My windows store has been corrupted](#)

krypt0 d3st0y3r - February 16, 2017, 2:06 am

when i try to access the windows store, i get this msg

something happened and the windows store is no longer working. Please restart your PC and try again. If this problem continues, you might need to refresh Windows on your PC.

please help, i need the win store to get a bitcoin miner :/

oscast - February 16, 2017, 6:11 am

Image is broken my dude, repost please?

RainSpider3000 - February 16, 2017, 6:15 am

Simple fix. As a Senior Systems Administrator... This is a must! Open command prompt as admin, and type "wsreset" and wait patiently for a few minutes. But make sure the store app is closed before you type this.

Open command prompt as admin, and type "wsreset" and wait patiently for a few minutes. But make sure the store app is closed before you type this.it worked for a few secs but then popped up with same msg :/

Edit: tried it multiple times

i still need a fix from someone :/

any help appreciated

TheChi?f - February 16, 2017, 11:15 pm

"1. Take ownership of: C:\ProgramData\Microsoft\Windows\AppRepository ([Tutorial for this](#), if needed.)

2. Delete "PackageRepository.edb". You should also delete the edb.log and edb(numberxxx).log files. (I did NOT delete any XML files because I have so many unrelated ones in that folder).

3. And then, reboot your device.

Hopefully, this solves your problem! If not, let me know, and I'll try to find another solution.

Le Chief. Answers Microsoft... Aggron... Memes... You know what I mean. :P

PerfectStorm - February 17, 2017, 12:34 am

I remember this happened when cortana failed in event viewer and I was unable to use the windows search bar for weeks very annoying but Im guessing you're not facing the same thing. I had some kind of store activation error as well in event viewer though.
