There is a site like bunch of people posting their own signatures PSD's so people can edit and use it (with credit ofc).

Let me know :)

I'm guessing what you mean is you want us to tell you if there is somewhere where people post that stuff? Not sure about whether they post signatures, but there are many sites that people post PSD templates too, shouldn't be too hard for you to find a lot of them.

I would be careful when downloading PSD's from random sites. Just a heads up.

vk.com

Just use translate bc it's russian. Got tons there :)

You'll also get to see some plugins you might find handy. I know I do.

Talked about free ones, seems like youtube helped me out with it by just searching logo PSD and signature PSD
