Pretty basic and mediocre..

But you are getting there. Who are your influences in logo design?

Nyxuo - February 17, 2017, 6:33 am

A lot of them look pretty basic but not in a bad way at all. You're on a very good track and you've got some clean logos created. Keep doing what you're doing for sure. I'd recommend exploring more with the icons you're using but everything looks pretty legit to me. Definitely room for improvement but there always is.

Some of them look really good, but like Pacioli said, everything kinda looks basic and mediocre.

Android_Immortal - February 17, 2017, 9:56 am

The basic and simple look is what i go for, These logos here are only a few, I have about a hundred more. The reason they are basic is because most people want basic. It stands out more, unless you have a gaming team/company and/or organization there is no need to create super complex logos. Although i do have some complex ones.

Thank you all :)

Have you considered using Carbonmade to host your portfolio? if gives you more options than Instagram.

Android_Immortal - February 17, 2017, 6:15 pm

No i havent, ive seen it used before and I enjoy the features it has, I may make the switch.

They're a bit simple and for whatever reason they're all icon over here text over there.

They don't look bad but they also lack creativity..
