Thread: [Mobile Application](#)

venu - February 16, 2017, 7:47 pm

Hello guys,

I would love to see the mobile application for Hackforums (Official).It would be so much easier to check everything on mobile app.

So, what you guys think ?

Flared - February 16, 2017, 7:48 pm

I personally think this is a great fucking idea but was denied I believe.

Prepper - February 16, 2017, 7:50 pm

I would say wait and see what is in store for this supposedly upcoming 1.8 upgrade.

I think a responsive theme is more convenient and obviously when he moves to 1.8 a new theme is most likely going to happen because it would be a hassle to rework the 1.6 theme.

Bluffer - February 16, 2017, 8:04 pm

The new theme on Mybb 1.8X will be responsive Omniscent has said.

App likely wont happen.

Regan - February 16, 2017, 8:05 pm

Ain't this being denied multiple times?

The GRim - February 16, 2017, 8:05 pm

It would be easier but like this has been denied a lot of times.

Must not be possible to implement it.

Charger - February 16, 2017, 9:50 pm

No.

Go search like the header says.

vaiperboy - February 16, 2017, 10:09 pm

well,

im not sure if tapatalk works with hf but u can try that,

also, a responsive theme to phones would be better than an actual app (imo)

Unknown - February 16, 2017, 10:10 pm

I hate the bearer of bad news ... unfortunately this idea has been thrown out more times than I can count at this point.

Who knows, maybe he'll have a sudden change of heart. I just think it's unlikely.
