Thread: [Visual Basic error on install](#)

gilles - February 17, 2017, 9:25 am

Hey guys i tried to install vs today and i got this error message: <http://prntscr.com/ea004m>

I've done evrything they said installed the thing they asked me to install and still get this error message i've installed all my windows updates too still didnt work :!

If you know any solution please let me know thanks!

Cheers.

So you are sure you have installed the update KB 2919355?

Go to your control panel and search for the update: <https://i.imgur.com/INy6Wb5.png>

And if you haven't done so, restart your computer.

if you installed what it said in image then restart the PC and try again.
