Thread: [Fake website traffic generator](#)

SaltyTayTay - February 17, 2017, 4:16 pm

This program generates traffic on a website

Some people may know about it under the name of jingling.exe. Its useful and used it many times download link bellow. I used it myself and did not find any malware with my AV. I suggest to use it in sandbox or Vm for safety. Direct mediafire and mega link bellow.

[deleted]

Cant post links since i starting using hackforums for a while now need 50 posts ?
