Thread: [\[Help\] Skype Resolvers](#)

Kodaz - February 17, 2017, 7:33 pm

Hello guys... Recently noticed that It's got almost impossible to block SkypeGrab from getting your IP... I've tried proxies even tried PIA socks 5 and none worked. The only one that will work is web skype but I don't feel like using that. Please let me know if you know of any way to protect against skype resolvers like SkypeGrab

Faith Connors - February 17, 2017, 7:36 pm

Change your P2P settings in skype.

Kodaz - February 17, 2017, 7:53 pm

I've already done that? If you're talking about the settings in connection tab.

skelly76 - February 17, 2017, 11:44 pm

Well you see, once you are resolved once, it keeps the record there. Your only option is to pay them to blacklist or change your IP.

Infamia - February 18, 2017, 1:17 am

Switch Skypes and use a proxy.

Simple, then log your proxied IP onto the resolvers' databases and for it for multiple proxies. Then the database most likely hide your IP in between the proxies IF you don't use a proxy.

Laski - February 18, 2017, 7:26 am

I'm pretty sure new skype versions fixed resolving awhile back?

Anyways, just keep using proxies until your real IP is overflown with the proxy IP's. It'll be harder to figure out which one is which. This is what i used to do.

Kodaz - February 18, 2017, 11:07 am

The new skype version is resolvable... I just installed 7.13 and I cant be resolved.

?-? ??? ????? - February 18, 2017, 11:10 am

You could always be a filthy deplorable and pay for them to blacklist you, my friend did it and I spend the entire day ripping on him lol

Kodaz - February 18, 2017, 2:09 pm

I found out how to be unresolvable.. Going to make an updated tutorial now.

Posted a tutorial
