Damn, that singed trick with the invisible poison is rad. Nice montage though. Always love to see a good Singed player. I don't see many down here in Silver 3 :(

Nope, you need to change the settings in the config file manually to make it work now I can make a tutorial for it if people are wondering.

Yeah that would be cool if you can. Riot allows the use of this? Would this be considered a bug?

How do you play Singed in a team fight? or at least mid game? I like the champ and have been playing him for a bit but have been like 0-6 w/l on him last few games.

Not sure why tho, I win lane (pretty hard or get a lot of attention) get 5/6 times first tower. And roam... but can't seem to carry mid game with him that I can do with other champions like Irelia.

There is 2 key roles Singed has in team fights, one Zone enemy carries and peel his own. Key points to keep in mind don't blindly fling the enemy if your team isn't behind you to follow up if your in a case where your team is being divid by their backlines and you need to go help them run at the

enemy carries and pretend you are going to fling and as soon as they use their abilities to escape turn around and go fling the enemy dive off your carries sorry if it was a bit messy but best I could explain how I teamfight on singed.
