Thread: [\[Help\] Enabling the maximize button](#)

JoshuTee - February 18, 2017, 8:15 am

I've written a GUI program in AutoIT, but the maximize button remains grayed out.
How can I enable it in order to allow the user to maximize the window?

Thanks!

```
Code #include <GUIConstantsEx.au3>
#include <WindowsConstants.au3>
```

Example()

Func Example()

 ; Create a GUI with various controls.

 Local \$hGUI = GUICreate("Example", 500, 500, 500, 500, \$WS_MAXIMIZEBOX)

 Local \$idOK = GUICtrlCreateButton("OK", 310, 370, 85, 25)

 ; Display the GUI.

 GUISetState(@SW_SHOW, \$hGUI)

 ; Loop until the user exits.

 While 1

 Switch GUIGetMsg()

 Case \$GUI_EVENT_CLOSE, \$idOK

 ExitLoop

 EndSwitch

 WEnd

 ; Delete the previous GUI and all controls.

 GUIDelete(\$hGUI)

EndFunc ;=>Example
