Thread: [She died???????????????](#)

Magna imperium - February 19, 2017, 10:42 am

As some of you might know, i had a tarantula, today, she died.

Im not sure why did she die, however i have few theories.

- 1- Some product that i use to clean my room might have reached her.
- 2- 2 weeks ago this happened <https://hackforums.net/showthread.php?tid=5542177> , it might have caused her internal damage and took her slowly.
- 3- The crickets had some kind of parasyte, suddenly them all are dying in waves.

Im not sure if it was option 2 or 3, i really doubt it was 1 as i really take care of that.

Jason i know you're reading this,fuck you.

Btw, read last pages x)

Option 3: someone stepped on it?

I'll rise a hat for you just because you could live with that in your house, I can't stand all types of insects...

If she had an HF account, all you would have to do is check her negs and you could narrow down the suspects ??
