raider_pride179" Wrote: [\[CITE\]](#) I was thinking the same but honestly I've made some good money recently and decided what the heck and purchased. Let's just say with high price comes high quality.

The quality of this ebook is literally unbelievable. 9 pages with like size 12 font and there are images etc to very clearly explain everything. The manual methods themselves definitely make sense and I doubt I am ever going back to scripts. Money is much faster and safer plus when you play with Underrateds method you can always ensure that the bonuses are bring you in extra profit at the end of the day.

Anyways holy crap lol I played for 3 hours and this was the result:

Bailable Wrote: [\[CITE\]](#) Did a 13\$ investment, gained 10k+ bits already!

The method is 25% skill, 50% instinct and 25% luck!

Works well, not sure about the ultimate package, you can lose with this, but that's where instinct comes in =)

Predicting helps, a lot!

>> Frequently Asked Questions <<

Q. Why is the price so high? This seems overpriced.

A. The price in my eyes is actually still low considering how profitable these methods are. This isn't some random write up these methods are seriously backed with research from experienced Bustabit players.

Q. Does this work worldwide?

A. Yes this works absolutely anywhere in the world, you can even use a mobile device!

Q. What age do I have to be to use this?

A. There are no age requirements you can get right to using this no matter what age!

Q. Is this difficult to use/setup?

A. No you can get earning right after purchase. There is no setup required so profits are nearly immediate!

Q. How much can be earned with this method?

A. This can all vary, generally you can earn \$60-\$200 an hour based on your investment. It is very well possible to earn even more than that, this can be scaled!

Q. If you are profiting why are you selling the method?

A. This method can never be saturated which means selling it doesn't hurt it, I am quite new to hf and would like to expand my knowledge while still earning an extra buck on the side as well. Finally most importantly I am currently looking to purchase a nice car so the extra income takes care of my bills while my profits from this method go to my car funds.

Q. How does this work?

A. Bustabit technically has 2 games running per round. It is Player vs House and Player vs Player. The method takes advantage of player bonuses thus creating an overall odds advantage allowing for constant long term profits.

Q. Which package should I pick?

A. In general terms I always recommend going with the squid package. The extra method is actually useful and very profitable as well plus the support and extra features really help out a lot. The method is a lot more explain too.

Q. Can I expect steady earnings?

A. Yes it is very reliable but remember gambling is never certain. You should see something along the lines of this though:

Decided to throw in \$10 btc and after a short 20 minutes I withdrew \$80, im literally shaking because of how insane this method is. Going to continue in a few hours when I come back home

Haha good call mate, BlackShadow sells troll methods and people fall for it because of his rep. Bustabank is 8+ pages super detailed in size 12 font.....it doesn't just explain the method it explains alot more such as how much to bet from your investment, withdrawals and lots more private content!

Realistically \$10 should do you just fine starting out. It doesn't take long before your start expanding you bankroll and are able to do larger bets etc and profit more.

Would I get a refund if I were to purchase and debunk how you do not have a winning formula if I provided with mathematical evidence to back up so?

This method takes advantage of the bonuses. Bustabit is composed of 2 casinos - Player vs House and the Bonus Pot which is Player vs Player. Our manual methods allow you to increase your bonuses and ultimately put the odds in your favor using the PvP side of Bustabit that is integrated within every round.

I know how bustabit works and I can guarantee not many people have done a research like mine, but that is useful for those who didn't know. However, the question remains unanswered. I also think you shouldn't be using the expression "put the odds in your favor" in this very specific context.

Thanks for the talk and good luck.

Probably doesn't give a fuck because Mini banned the OP forever as he admitted to scamming.

Abe Washington - March 10, 2017, 2:34 pm

Honestly, can't recommend it. Bought the \$40 edition and regret it. Nothing in the book worth

reading as the "methods" aren't methods. Basically says bet a certain way and stop betting before you lose. Total waste of money, would love a refund but doubt OP would give me one.
