Thread: [Which is the best reseller hosting to start a webhost.](#)

Neverest - February 19, 2017, 9:44 pm

I have studied the market and I want to start web hosting services for where I live.

There are not many providers here so

I will be providing cheap plans keeping very low profit margin on Shared,Dedicated hosting and also VPS hosting.

[Social media marketing will be done for Advertisement]

Please suggest me best Resellers to buy Reseller hosting plans from.

Well, that highly depends on where you live and where you want to provide hosting services. For example, providing hosting services in Europe and you have a US reseller hosting will result in slower loading times of the first page and visitor's initial impression of website, it being slow, is not good for the customer.

I suggest using OVH, they don't have reseller plans but they have very cheap dedicated servers. They are even used by a lot of hosting providers here on HF.

dedicated + dedicated cpanel license (\$35) is going to be much more than a reseller account (\$10-30)
