Maybe try centering your thread. Might make it look better slightly.

Chevalierdesigns made a cool custom thread design for my webshop.

It was a pleasure to work with her and she had some great ideas on how we could improve the design better.

It turned better out as expected.

I recommend her to everyone.

The quality is the icons themselves is sad. I wouldn't use this even if someone paid me. You may have nice designs, but the current thread isn't convincing me to buy from you.

Sorry.

Sorry.

It was a small resolution design and the stretch on HF made it look rather bad. Customers will never receive it pixelated like that. Simply tell us the resolution you want and you will get the highest quality
