Thread: [Logo examples please](#)

Moseby - February 20, 2017, 10:03 am

I'm out of ideas.

I'm looking for logo ideas for a company who offers different kinds of services. Mostly techstuff. Computers, websites, apps etc. etc.

If someone got any creative ideas please post them below or Hmu.

We can't really help you if we don't know the name of the company buddy..

I don't want the company name to be in the logo so it doesn't really matter buddy

The name would still influence the logo.

Even if you don't want your name included.

Having a name like "Techcity"

With a logo of a camel, isn't going to be much use to you.

Please read this thread, on how to create a graphics request.

If you don't want your name to be on it, but at the same time be techy themed, then here are some examples you might get yourself inspired from.

Dribbble and behance are great for inspiration too.
