Thread: [FREE Instagram Follow/Unfollow Bot](#)

Kicking - February 20, 2017, 6:26 pm

I am giving away a program that I purchased the source to that basically follows a whole list of people on Instagram and the Unfollows them after it is all done. I am giving this away because I do not feel like it is near good enough to sale.

I had a thread about this already but Eagle95 junked it and gave me a warning because I had "comment or PM me to get this" so I am going to fix that up and hopefully it won't get junked again.

How to use;

1. Open up your browser
2. Open up the program
3. When the program is open and on top and selected press F1 ON THE URL BAR so it sets the bars location so it can insert the link
4. Add a list of WORKING Instagram URLs (I will include a list I was given, but be sure to remove the non-working links)
5. Start

Current bugs that I won't and don't care to fix

1. If the Instagram URL is not working, the program will crash and you have to restart

Please PM me if you want this product. Because commenting for it will get me in trouble.
