Thread: [My panda after surgery :\(](#)

Lufasu - February 21, 2017, 7:39 am

So the quickest story -

My dogs was peeing around all the house because i have male and female, they was trying to do sex and i dont want any more puppies because i get back to live with my parents and i cant get more animals because my mom doesn't want.

If it was in my house i dont mind ofc.

So, i told the vet not long ago that i want him to do the surgery and after i was going to him (today), he told me that 'Panda', she was have some infecting thing on her vagina so without any connection to the "sex thing" that i talked about, he was need to remove her vagina because if not she can be sick and die (rare).

So i agreed and he was doing it.

There is a pic after the surgery -

Current status -

She cant move, I mean she can but not that much.

She still dont know what happened (seems like)

She cant sleep and eat

She is kind of sad and mind blown atm.

Will update more later :)

?????s? - February 21, 2017, 7:40 am

Holy fuck they just cut her vagina out?

That's wicked.

Webmasters - February 21, 2017, 7:42 am

Have never heard of them cutting something like that out.. Hope everything goes well for you.

Lufasu - February 21, 2017, 11:10 am

That's wicked. Not like cut it with a knife or smth lol, its in surgery.

(Feb 21, 2017 08:42 AM)Webmasters Wrote: [\[CITE\]](#) Have never heard of them cutting something like that out.. Hope everything goes well for you. People doing it sometimes as i know..

And thank you very much

Mr Kewl - February 21, 2017, 11:19 am

I think its called vasectomy. (Female sterilization is a permanent procedure to prevent pregnancy. It works by blocking the fallopian tubes. When women choose not to have children, sterilization can be a good option. It's a slightly more complex and expensive procedure than male sterilization(but in dogs)

Yes it is, That what i wanted to do at the start but then he was like "she might have an infection over there because her vagina was like a baloon, so big"

and I thought it was because her period tho.

So he told me, dont take the risk of infection and its the right thing to do.

zeroday - February 21, 2017, 11:22 am

I would hate to be a Dog...

Mr Kewl - February 21, 2017, 11:22 am

Yea haha, but he was like dont take the risk of her being infected on her vagina because its dangerous.

So he told me that i was doing the right thing.

Chris? - February 27, 2017, 8:55 am

thats so sad): the dog looks so cute

Lufasu - February 27, 2017, 8:57 am

She is okay now i think, She started to eat and drink more.

Tomorrow i need to take her again to the doc so he can remove this shitty thing from her head and give me some pills to give her after he remove it to kind of "clean her vagina and add some vitamin" 4Days ago she slept like 15 hours with me she didn't even wake up because the first 2 days of the surgery was critical for her.

brianfs - February 27, 2017, 4:15 pm

I have made same surgery to my cat but not had any issue because after the surgery 3 days the doctor call us to inject some antibiotics to not get any infection. That doctor not make any antibiotics to your dog?

Leonardo DiCaprio. - February 27, 2017, 4:18 pm

Rushed to this because I thought you meant a real panda, (love pandas) but seriously hope your dog is okay. Good luck girl

Lufasu - February 27, 2017, 4:26 pm

He talked with me about pills today, tomorrow he will get them I gueses those pills are antibiotics I'm pretty sure.

He didn't inject any..

Haha :D

She looks like a panda and thats her name xD

Thank you very much man.

zajneforevah - March 29, 2017, 1:33 am

oh little cutie, hope it will get better soon

Francoo - March 29, 2017, 5:54 pm

sad bro :(i'm with you :(((

Obunga - March 31, 2017, 1:49 am

aww poor dog. I feel worse when i see animals in thees positions then people.

TotallyNotBoxxy - March 31, 2017, 1:52 am

That's not a panda. You totally lied.

Obunga - March 31, 2017, 1:53 am

Booster99x - April 6, 2017, 1:58 pm

While reading the title I was thinking that "WTF this guy have a panda? xD"... I'm disappointed :(He's beautifull!

derpallday - April 6, 2017, 6:59 pm

I guess I would be sad too if I woke up and my genitals were missing

Mi2414 - April 7, 2017, 4:58 pm

She's cute bro, I miss my doge I had before my new puppy. We had multiple vets tell us he had a hernia and it ended up being cancer. I was so upset, I couldn't go that morning and had to tell him goodbye in my bedroom alone. I really hate seeing animals get sick, it's one of the worst pains.

TradingBTC - April 7, 2017, 5:00 pm

hope he'll feel well as soon as possible!

Asian - April 9, 2017, 3:28 am

Aw, so sad to hear. Any updates on her?

Lufasu - April 9, 2017, 3:49 am

She is fine man :D

She is walking like always and I took her a week ago into the vet again and he say that she is clean from incoming infects and she will not can get any babies, but I pref her life and not the other thing.

cencor my sexy nipples.

ALZHEIMERS - *April 9, 2017, 7:35 pm*

She didnt deserve her vigina anyway

Mizzy - *April 17, 2017, 1:39 pm*

Damn , thats sad mate...

Hope she get well very soon.

edit : didn't saw your last post..

I am happy that she is fine
