venmo can be a option if you both make an account

Virwox will let you buy BTC with a MasterCard. Also Coinbase and Blockchain but I think they require more ID

Venmo, Bitcoin, gift cards... PayPal is the shittiest payment processor ever lmao

Skrill, payza, neteller there's probably more

Google Wallet, Venmo, Square Cash, Circle.

Google Wallet is my favorite. You'll receive your funds instantly once you withdraw your balance.

Let him go to the ATM, withdraw money, and purchase you a PayPal cash card. You have to be 18+ to redeem it

If he has a credit card, there is a way to send money without an account.

Code <http://paypal.com/xclick/business=>

At the end, have him put in the email you use for your PayPal account.

Fill out any info as needed. This is basically you creating an invoice on PayPal and then paying it to the user whos email was put on that URL. It will send as goods so they will take a fee, but this is the best I can think of for your situation.
