Thread: [2 years feedback :: 8k posts :: 1k rep :: 5 months online](#)

hi, doing another feedback thread cause im a nerd and i love this website, i will try to keep this short as possible. ever since this past valentines I have been upgrading people to EPIC to kinda celebrate me being here, feels pretty good to do that for other people. my aspect of this website has not changed from last year, bunch of great people to learn from and bunch of weeb to make fun of. i will continue to be here for awhile, i do not see myself leaving anytime soon. but 2016 was an eventful year, alot of closed accounts, a real roller coaster of emotions since our lord and savior haydrazs left us. RIP DAN THE MAN. of course i am still active in the botnet section, helping those less fortunate and spreading my knowledge, but also active in the lounge to hang out and relax and take a break from the retards. also, moe ruined echo.

Omniscient. you're doing a great job, keep up the good work.

Shoutouts:
