Thread: [IQ Scores](#)

Techmech - February 22, 2017, 10:41 am

Post your iq score @below.
idk.

Davian - February 22, 2017, 10:45 am

140 but I took the test when I was 7 years old.

C?rrupt - February 22, 2017, 10:58 am

134 Was mine, I'm pretty happy with that number :)

Bugged Genius - February 22, 2017, 11:06 am

Well i dont want to be bragging here but my iq is well below avarage.

Moon - February 22, 2017, 11:11 am

Where can I take the test?

Fantod - February 22, 2017, 11:11 am

All the online ones are fake to make yourself feel good.

spoofnodes - February 22, 2017, 11:13 am

Im a 134, yeah, I did a real test.

/////25chars

tim23inc - February 22, 2017, 11:53 am

damn...my Iq was like a 0.7

julionunez - February 22, 2017, 11:55 am

Imfao at all the people claiming 130-140.

You guys do realize that even 130 is two full standard deviations above the mean right? It's highly unlikely that you would have an IQ that high to begin with, let alone everyone who responded to this thread.

People always say 130-140 because it doesn't sound too high so as to sound unbelievable, but doesn't seem "too low" compared to the common perception of what a high IQ is in society.

Even 120 is considered vastly superior intelligence relative to the general population. 140? Proof or gtfo.

Even the smartest of the smart, electrical engineers, don't even reach 130 on an average. What makes these people on hackforums think anyone will believe them when they spout this nonsense?
