Thanks Man, We haven the most powerful servers to serve mail marketing .

Nopee - February 23, 2017, 10:48 pm

Thread looks good.

How about your deliverability rate on major email providers?

What emails do you allow?

Your Sending speed for your emails?

Custom domains or you provide the domain itself for mailing?

Thanks For the compliment.

Now, For major email providers like gmail,aol, hotmail ,yandex,yahoo etc.

We will process the delivery via inbox smtps, they will be on autorotation in order to avoid any factor

which could blacklist the IP.
Server will always remain healthy.
Sending speed we can setup upto your choice.

Also, We will provide the domain itself for you.

Inshort, We will setup a-z , all u need to do is make your content ready and deliver
