Thread: [Razor HF \(Paycore, RazorCrypt, Razorsoft\) <--- Updated information](#)

Pronouncer - February 22, 2017, 3:04 pm

let me introduce myself. I am a known affiliate with numerous hacking groups with various other aliases. i work for a Hacking news agency with private connections and a lot of personal information on the clients i deal with.

I'm not sure if you know I have close connections with Razor who ended up getting raided due to RazorCrypt and Blackshades.

There was a big raid on numerous members and a shut down on all systems owned my Marcel (Aka razor).

We know numerous members where connected closely with him and were raided previously.

Me alongside his old business partner have received information on what has happened to him.

Razor has been sentenced to jail for 20 Years, due to numerous crimes. There was also some research done by a group on hf numerous years ago that had shown Marcel had carding activity. He had been charged with financial fraud, he also had staff access on numerous carding forums. Due to his age his charge was made to only 20 years. if sentenced in a country such as USA the charges would have been stacked.

His affiliates where shortly raided and had their systems confiscated for numerous weeks and analysed. after discovering access to numerous panels more raids become apparent as all client billing information to software was available.

Razor will no longer be on HF and due to his sentence by the time he comes out of jail he most likely will never touch a computer again.

Hmm, i have tried to find info on it numerous times (As i used to work with him and haven't heard anything since the raids)

Can you confirm sources?

Nop i dont work for krebs. I wish i did apparently it pays well xD

Armada - February 22, 2017, 3:23 pm

Give us proof or you are full of shit....

VirtualFrost - February 22, 2017, 3:43 pm

If an arrest happened, isn't there any arrest records or news stories at all posted anywhere?

#Skyline - February 22, 2017, 3:51 pm

Fucking cunt owes me \$, but having him locked up for 20 years makes me happy.

Well if thats the case, can I take my copy of Razor crypter and remove netseal and get it refud?
lmao ?

Its been done many times before, infact user modded razorcrypt versions are more stable than his.
