Thread: [BET365 A Way To Make Money Out Of It](#)

SugarDaddy - February 22, 2017, 3:13 pm

Hey , I decided to share with you guys the method how i made \$500 from bet365 with \$800 investment.

I guess you guys are familiar with bet365 .

So here it is, for every new user bet365 gives away a \$200 welcome bonus. It is critical to remember that to access some of the Welcome bonus you will need to use a specific bonus code. For the new sports betting accounts simply use BONUS200 in the bonus code section when registering.

To be able to withdraw the bonus funds, you will need to rollover 3 x the total of the deposit and bonus,

but your original deposit and profits you make from that deposit are withdrawable at any point.

\$20 first deposit is matched with \$20 welcome bonus

\$100 first deposit is matched with \$20 welcome bonus

To maximaze \$200 first deposit is matched with \$200 welcome bonus.

Activating the Welcome Bonus

Once your initial deposit , you will now recive an email detailing a 10 digit Offer code . Now it is time to activate the bonus . Go to the Services menu and select Members, then go to Offers and enter your emailed bet365 promotional code.

Your 100% deposit bonus is now activated and will show your original deposit as a balance, with the same balance as a bonus token sitting in reserve.

Withdrawing your bonus funds

To be able to withdraw the bonus funds, you'll need to rollover 3x the total of the deposit and bonus.

So, if you deposit the maximum £/€200, the total you are required to bet to withdraw the bonus is $3 \times £/€400 = £1200$.

Here starts the tricky part

Lets do some math :D . We will need four new bet365 accounts.

We can pay with neteller or a credit card to deposit \$200 in each.

You can verify with your dads, friends , fake id. Its all your choice.

Lets say we deposited \$200 in each account .

\$200 + \$200 welcome bonus.

So , its gonna be \$400 in each account.

Now it is time to bet .. Lets for example choose Chelsea vs Swansea upcoming game on 25th .

We can choose to gamble with goals odd and goals even .

It is gonna be either odd or even .

The odds for odd is 1.95 and for even is 1.9.

With 2 of our accounts we pick even and other 2 accounts we choose odd.

Lets say the match result is even.

So it is gonna be $\$400 \times 1.9$.

We gonna have \$760 on account 1 and \$760 on account 2.

We lost on account 3,4.

Now it is time to gamble again.We pick another game with same odds.

Account 1 we go for even and account 2 for odds.

\$760 x 1.9..We have \$1444 on our account , while we lost the money on all the other accounts.Till now We have gambled \$400 + \$740 . \$1140.

We need to gamble \$60 more so we can withdraw. Now we just gamble for fun \$60 of our personal choice.

That means we have on our account \$1444 - \$60.

\$1384 - \$800 we first deposited equal to \$584.

Now we can happily withdraw to \$584 without any risk

Technically, yes, so don't do it in a way that you can be affiliated with it. Do it "legit". You surely know 4 different people i 4 different houses. They are all allowed to bet and use up the "bonus". Reward is pretty solid

It is not risky at all . There is tons of ways to do it.

I wish someone could move the thread to the giveaway section.
