Thread: [\[ALL\] How To Watch TV Shows/Movies on Any Console!](#)

Lexy - February 22, 2017, 10:20 pm

Seen someone doing this only for L33T/UB3R's so I figured I'd give it out to all members as this shouldn't be something limited.

No, I didn't PM him or anything and I'm not giving away what he does.
It just so happens I know a website. :)

If PS4 gives you an error, go to the settings and turn off JavaScript and Cookies after you've started your movie.

Should work fine on Xbox One.

Works fine on PC.

The only thing that is bad is the ads.

MovieSurf.io is also great, but you now have to pay to stream TV shows.
