You seriously don't know how to write a poem?

Make the ending words rhyme? Thats how a poem works lol

There are different types of poems- you need to be more specific

A inspirational 10 line poem

Well if its inspirational, make sure it rhymes so has good effect on the reader.

Most poems i tend to remember are nice and short, so if you really wanna inspire and keep it stuck in someones head keep it nice and short broski!

Remember , quality over quantity!

I suggest trying to find words that rhyme.

Example:

I like to swim in the ocean
I want to make a love potion

Try to rhyme alot, that automatically makes a poem better imo. There are many websites that will tell you if something rhymes or not.
