Thread: [Programming a bot Question](#)

heik0 - February 24, 2017, 12:55 am

Hey Guys , i have a problem im playing a game called warofdragons and there you need to move on youre mouse on on resource to collect them. I would like to make a bot that does it for me any ideas how i should start or is it even possible ? and if yes would any one like to help me ?

thanks dont hate on me :D

clrlslwi - February 24, 2017, 12:57 am

Nah bro, I don't think this is possible. Sorry.

heik0 - February 24, 2017, 12:59 am

Ive seen people do it, so it should be possible

Nonono, it's definitely not possible. I have inside information on this.

heik0 - February 24, 2017, 1:10 am

the fuck man why you trolling bro i just asked a normal question

FriendOfRaven - February 24, 2017, 1:57 am

It is, but not for you.

No offence, but the fact that you need to ask if it is possible means that you haven't programmed before. I would start off in the programming sections if you want to become a programmer. The skills you would gain are rewarding but if you only want those skills for a script like this then your time would be wasted.

The person you say is 'trolling' you is actually trying to stop you from going down this road and regretting it by either not completing it or hating programming due to effort involved for a more difficult script as a n00b.

heik0 - February 24, 2017, 2:58 am

Ill take it as an advice thanks friendofraven i started cmd programming today

Elweth - February 24, 2017, 6:30 am

Don't bother programming, just get yourself a macro recording tool.

How would a macro help if the thing he is trying to collect is at a random location on the screen. OP I suggest looking into learning autohotkey or autoit, both allow for simulated input and have the ability to search for images on the screen.

Proves my point. This kid will take a lot longer to learn to code than his interest in the game will persist.

Ok, if you're seriously going to try this, at least don't choose batch. Are you kidding me?

Gorzoid - February 24, 2017, 3:22 pm

Obviously he means batch scripting but that's not going to get him anywhere

Ronan. - February 26, 2017, 4:01 am

I'll make one, pm me your budget.

Otherwise, just set up an AHK script if it's just clicking.
