Can I ask how long it took to make?

just curious

seems like a good product, price is a bit steep for me since its just for twitch chat and can be countered easily by follower only chat
either way glws

Unno like last day and a half off and on. A lot of low viewer streams don't know what followers only is. Accounts unfortunately cost me more than what I'd like them to.

One vouch copy for Ub3rs still available, let me know :)

HighTier - February 24, 2017, 2:21 pm

This is not like any other Twitch spammer I have used before. This thing spams messages so fast the only way they can stop it is by putting the chat in "followers only" mode. If you want a twitch spammer I would HIGHLY recommend getting this. It is extremely useful for spamming/trolling a Twitch channel. It is also extremely easy to use. All you need to do is put in the channel you want to spam, the message, and then the code you get after purchasing it. There is also a youtube video tutorial if you do not understand how to use it.

Photo of how to use it:

If this gets patched will you continue to work on it? Since there is the lifetime package.

Yes, but they wont be able to patch it, every account is using a different IP (diff email, email activated) and I actively update my account registration bot. They have followers-only mode and sub only mode which are the only things capable of stopping it.

I currently use TwitchIRC and TMI OAuth generator for my bot but can I switch it to websockets and my own oauth generator if need be and etc. I have an IP ban bypass as well.

Vouch for ChatSurge, after clicking bombs away it sends the bots instantly to the chat room. Only down feature is that it can't currently do followers only mode channels but a lot of big streamers do not have that enabled.

Here are a couple of screenshots.

Jire - February 24, 2017, 6:55 pm

Vouch for this product, works perfectly.

test - February 24, 2017, 7:20 pm

I received a 30 minute trial in exchange for writing a detailed and honest review of the product. I used this in multiple separate channels with varying results.

Interface and Design - [*****]

The website is extremely simple, easy to navigate and includes links to various important locations such as the YouTube tutorial and this sales thread. It is also Twitch themed and includes all the contact and pricing information you need to start using ChatSurge. The only criticism I have is that the design is extremely simplistic and lacks any real detail or structure.

Functionality - [*****]

The actual flooding of messages works flawlessly and instantly after sending the attack via the website. Within seconds your target channel is flooded with messages! Included below are a few screenshots I took during my trial.

Picture 1 [\(Click to View\)](#)

Picture 2 [\(Click to View\)](#)

Picture 3 [\(Click to View\)](#)

Pricing - [***]

The only downside to this service, to me personally, is the price. In my opinion I think the monthly pricing might be a little bit too high, however, this depends on how much it is worth to an individual.

Support - [N/A]

As I have not needed to contact the creator for support, I can't really rate my experience in this. What I can say is that he offers a wide range of locations he can be reached at including Skype, XMPP, Email and here on HackForums. Not only this but there is a YouTube tutorial of a step by step guide to ensure you have no issues using this product.

Overall Rating - [***]

A solid product that, with constant addition of proxies and accounts, has the potential to be extremely fun to use for a multitude of reasons. I definitely suggest checking this product out if it is something you are interested in!

Thanks for letting me try ChatSurge, OP, and best of luck with sales!

H\$G0D - February 24, 2017, 7:21 pm

I received a vouch copy and I could only say that this is the best product I have seen within this category.

The second I clicked attack, the messages came flooding in at approximately a 5/10 messages a second rate, great amounts of fun and I would most definitely suggest buying this.

Website is ridiculously easy to navigate around and it had a very clean and simple design aswell.

Edit: I am probably set to buy this judging by how cheap and fun it is.

Edit 2: Seeming how good of a product it was, I have now purchased it.

GG123 - February 24, 2017, 8:05 pm

I received the trial for this product and wow, It is absolutely amazing!

The bot pretty much started spamming instantaneously and I was able to actually get a streamer to shut down his stream.

This is an immaculate product and it's quite innovative as prior to this ive never come across a

product such as this.

10/10 Highly recommended

Really expensive for what it is, though.

People keep saying this, but they don't understand how expensive solving NoCaptcha is if you're forced to use an API like me. It's like 3\$/1000 captcha solves (this is maybe like 500 accounts unfortunately) and I have to replace accounts constantly to keep this service running. Also 30\$ for a whole month of probably one of most innovative and unique services? That is pretty cheap man.. This post may come across kind of rude but I keep hearing shit about the price and it just annoys me.

EDIT: Sorry, in the OP it says it's in Python but to reiterate it's in Python.

People don't usually think about the work being put in, they care what they receive. Adding more features would make it seem "fuller" ;)

Also, Django, Flask or Pyramid?

It's pricey, but the price includes unlimited and unmetered use of proxies and bots.
The speed is.. instant. You'd be surprised if I told you it was created in Python.

It's fun as fuck, especially as it follows the user first, meaning it bypasses the follow requirement.

Have had so much fun with this!
Buying lifetime somewhere this month.

Viitorul - March 6, 2017, 9:33 am

answer my PM please :D :D

obby - March 6, 2017, 4:36 pm

still for sale hmu <3 sold another lifetime today

bobbystantoine - March 6, 2017, 8:20 pm

Can you please post a video of it working in follower mode ?

Ask any one of my customers, all accounts will follow any given channel, unfortunately we have to follow for however long it's set to.

bobbystantoine - March 6, 2017, 8:22 pm

I understand your confidence in your product but I think that, in a marketing point of view, you should show off the big selling point of your bot.

I constantly have my accounts follow twitch.tv/kagomea when I test, look at their followers if you want to see that my bots actually follow. Trust me this was easy to implement and someone would have said it was a lie if it didn't work.

YoschiW - March 7, 2017, 5:07 am

I buy a lifetime version and must say, its awesome! When the Chat dosen't trigger the People, then come the the Follower sound! The most People get then triggert as f*ck

Very nice Work bro!

It works perfectly. I purchased a trial, then upgraded to 2 weeks. It's funny because they put it in follower mode only and it keeps going. But then they put it to an hour or more, you play a game, then come back. Then they have to set it to 1 week follow only haha.

Currently the service is offline due to twitch banning proxies. So I wouldn't buy right now until it's fixed. Other than that the product is 100% functional.

thegodhello - March 8, 2017, 7:51 am

Currently there's some new anti-spam measures added by Twitch. Therefore ChatSurge is down.

But OP will fix it fast like always!

SN 1006 - March 8, 2017, 11:02 pm

Product was fun for the 4 hours I had it while it worked.

Do not purchase. He will not issue refunds even for people who bought 1 month membership because "he cant". This is a scam at it's finest.

Don't get me wrong, it worked perfectly fine. But now that it's down he's basically running with everyones money. Can't wait to get the negative rep for this. Sorry, but if you only give someone 48 hours of their 1 month subscription and can't refund (Without saying no refunds before purchase might I add) That is pretty scummy. Also considering you said it's not cost effective to get the service back up and running, as well as stating it is not going to be back up for a long time "probably".

You buy this product knowing well that it is patchable. What did you think was going to happen? That he was just going to outsmart Twitch every time they rolled out a "fix"?

This isn't a scam. I purchased 1 month also, but I'm not fussed as I knew that it may not be around for the duration of time which I paid for.

He knows how to fix it. That's the thing. He just doesn't want to since it's not cost effective.

How is it reasonable that I paid for 30 days and got the service for less than 24 hours... Seems wrong to me. It's not patched, just all the proxies are banned but it's "not cost effective" to fix the issue. So he just gets to keep my money and say farewell.

Facts are facts.

That I can't argue with, but he has put a shit load of effort into this service from my understanding and helped me a lot with it. To blatantly call him a scammer is ridiculous.

I hope it gets fixed soon. If it were more reliable (less down time), I'd continue buying this service.

"You buy this product knowing well that it is patchable. What did you think was going to happen? That he was just going to outsmart Twitch every time they rolled out a "fix"?"

I know currently how to fix the problem, but its not cost effective for me to implement. People can call me a scammer if they wish but I want to run this service more than anyone else wants me to run it. It made me a lot of money and I'm still mad that twitch did what they did. Maybe one day we will see it again and people that paid now will be given free time if that does ever happen.

BanHammer - March 23, 2017, 8:09 pm

He opened it back up, working for me fine again and really fucking fast. My key still works also.

Null - March 23, 2017, 8:12 pm

Just confirmed, it's back up and working and fucking powerful. Huge vouch(again) for Obby.

I replaced the accounts with an old batch that worked perfectly fine. Meh.

This thing is a monster, Op is literally the best, it annoys and trolls streamers soooo much definitely worth it

obby - April 3, 2017, 6:55 pm

Did another backend update to adapt a new mail provider. Running better than ever. Lifetime is now 150\$ USD paypal or btc, getting lifetime will include a free viewbotting script and a 10 second cooldown instead of 30 seconds.

Dev is really nice vouch :)

obby - April 5, 2017, 10:03 pm

Figured something new out for email verification, hopefully less downtime :)

I just accidentally set iptables to drop all incoming data trying to set something up, downtime for awhile unfortunately..

obby - April 7, 2017, 1:40 am

So I got the server back up, then made a DO droplet so I can have a constantly changing IP server to host a mailnesia clone for email verification. Hopefully a lot better uptime and faster spamming.

Twitch is attempting to take legal action on us due to people spamming stuff like "want to trade cp" or "allah hates jews"

I don't log attacks or anything so I don't even know who sent the attacks, but if they come to me personally i'm telling them to fuck off and TMK my local courts did as well.

I'm not a lawyer or anything though.
