Thread: [Learning c sharp from scratch..](#)

1MKD - February 24, 2017, 5:28 am

Hail,

I want to learn c#, wonder any easy or best docs or ebook or youtube link you prefer..

i am looking for making bots in general, will use multi threads and using sockets, and json wrappers, etc..

someone kindly show me the right path.

thanks..

It's a good way cause you will know what while loops, iterators, data structures etc does. Then just learn the syntax

Go to your library, pick up a book.

(° ? °) did someone say book? No don't go the the library watch this instead:

<https://www.youtube.com/watch?v=0p0JLFZj2C8>

or this if you want it all in 1 video:

<https://www.youtube.com/watch?v=lisiwUZJXqQ>

When someone says "Hello internet" at the start of the video I die a little on the inside.

No really, a book is better. It goes more in depth and it is better. There is something about reading a book over a video that works better. I dont know how to explain it. But I feel reading requires more concentration and attention and thus yields better results.

Any better tutorial videos you recommended sir?

or any book you recommended?

This is the most ridicilous post I've seen this week. Gratz on that award.

Now some real advice, buy a decent book. Don't expect yourself to learn to code in a few days or weeks. Take your time, read a chapter every X days and make every single assignment in the book. Struggle with some assignments and give yourself feedback. Ask yourself, why do I do this? Why does that happen and so on.

I'm using these at the minute and finding them quite useful (I am following their VB.NET guide, can't vouch for the others).

50 shades of grey is good I heard.

Jk, go to your library.
