Thread: [Looking for Expert Decoder/Decrypter ... paying up to 10k\\$](#)

roxx4x - February 24, 2017, 2:19 pm

Ok let me ask the other way, i think there is too much risk for you guys to make some partnerships.

I can pay up to 10k\$ + for this project, if you want we can fund it via Upwork or other safe sites, i dont have any problem with this, what i need exactly is to build a Clientless bot for a Mobile game, this Bot uses kind of an exploit to automate something which i will tell you in details.

This is 1000% possible else i wouldnt ask for this so i am looking for very talented people with knowledge about clientless bots, decrypting and so on i am also open for partnerships as you see so if this is also an option for you then tell me that i can show you a lot of proofs that this method is earning us high 4 digit \$ daily which is nothing new in the virtual currency business if you know how to :P

So if youre interested in an interesting and high earning job pm me your contact details, atleast listen to it you dont lose anything =)

Revived1337 - February 24, 2017, 4:59 pm

If you can PM me your contacts, I cant send pm.

roxx4x - February 25, 2017, 4:03 am

The real question is if you have the skill knowledge for solving the job, i doubt so ... so i am definitely not going to pay 50% upfront hahahahah also the project is way too profitable for such kind of deals on hackforums, we can use some serious platforms with middleman or you show me atleast some core features before i pay anything
