Thread: [Logo needed for Business Project](#)

Grimace - February 24, 2017, 7:21 pm

For my Management 261 class, my team and I need to make a big business proposal as a major part of our grade. We decided to do a go carting business that is called Thrill on Wheels. Our main idea is Go-Kart soccer like in Fantasy Factory. I'll link the video, but i was thinking a logo involving a basic vector go cart outline with a helmeted rider inside as soccer balls as wheels. I'll share the one I made but it's not very good. If someone could help me better mine or make me a nicer one it would be appreciated.

I know it's not the best, I'm doing some free stuff to practice making logos and such using illustrator. I can provide AI and PSD files if anyone would like to modify my design.

Those are really nice, any way you can incorporate a soccer ball into the logo? Two soccer balls should work out nice as the wheels.

EDIT: I'm bugging I see the ball now haha. I really like this logo dude.
