Thread: [Paid for upgrade ; how long to wait?](#)

Cylow - February 25, 2017, 12:24 am

So I just paid for a L33T upgrade completely but I'm still not upgraded. How long do I have to wait?

J?son - February 25, 2017, 12:26 am

you'll be waiting a long time, might even get refunded a few times

Typically within 2 hours. The process is automated when enough confirmations for the crypto currency has been made. Do not inquire via PM or create a support thread until at least 24 hours have passed. Include your transaction ID.

It will take some time for your account to get upgraded

wait for some time you will get it after the payment get confirmed.

Okay thanks a lot

You may not have to wait long, it may take a couple hours, but it depends. This 'clog' as users said has been going down over the past two days and it's nearly back to normal. Look at your transaction, once it starts getting confirmations, that's when you'll receive it. I think it needs 2 or 3 confirmations before you get the upgrade. It'll be added automatically.
