There are different specs. They are all SSD, but if you want "quantity" you can get many. If you want "quality", of course you'll get less.

Vouch copy?

I'll take one if they're needed.

FatStacks - February 25, 2017, 2:35 pm

Are you getting cloud resources? And can this be repeated? Also, are these servers easily banned and or what do they allow? If I wanted to run a OpenVpn could I do so? How much monthly bandwidth can you get?

Also please consider giving me a vouch. I can really relate to the non-upgraded population that makes up a majority of this site. I do hope to one day upgrade tho

The method is repeatable. I don't know honestly about getting banned or what its allowed, I'm using

this method for months and never got a problem.
For the vouch, same of above.

Method works. If you got a ban for doing illegal stuff with the VPS its not my responsibility.
I'll provide the necessary assistance to get the method work if you fail (nearly impossible)!
Make sure to have a Credit Card (I personally use prepaid but not every prepaid works) for identification purposes (No charge)

Yes, it's lifetime, and more credit cards = more VPSs.

I don't think it will be ever patched, there is no need to.

But better don't saturate too much!

My Review

I was skeptical of Phoenil's claims at first, but we had a little chat and he was nice to chat with, very friendly and answered all of my questions quickly and professionally. I decided to purchase the limited edition version.

Originality

I've personally never seen this method before.

Claims

Sometimes you see something being sold that promises you \$1,000 per day or something stupid, however the claims the author made about this particular method seem to hold up fine. You will get servers using this method and you can make money using them in the way he says. No additional investments are required except for the money you spend on the eBook.

Difficulty

This is a very simple method to execute. If you can read, you can do this without any issues, it doesn't matter where you are in the world or how old you are.

Time Consumption

The time it takes to execute this really depends how fast you are. If you read the method properly and do as it says you can do it in just a few minutes. The more you do it, the faster you will be.

Earnings

I've never seen this monetizing technique before and I'm excited to try it. After reading through, it does seem to have potential to earn you quite a bit of extra cash which makes purchasing this method even more worth while.

--

All in all, if you want to get your hands on a lot of decent virtual private servers, this method should be your go to choice. Not only are you getting a worthy method to get servers, but you have the potential to make your money back and even more!

iNuno - April 26, 2017, 2:45 pm

I bought the premium limited edition and there's my honest review:

This method is known but not known at the same time. This is a very-well know company that sells VPS but there's a thing with it and I didn't know about.

The monetizing part it's private, there's a lot of things like this but won't work like the one that is on the method.

PS: If you don't have a real credit card in real life, don't buy this method. I don't have one so the method is totally useless for me.
