Thread: [Free: Learn Excel, Spreadsheets, Formulas, Shortcuts, & Macros](#)

DontWorryBeHappy - February 25, 2017, 11:46 pm

What if you could boost your productivity immediately? Can you imagine the doors that will open to you once that happens?

- Want to be more productive at work and at home?
- Want to spend less time doing office paper work and the frustration that comes with how disorganized things can be?
- Wish all your tasks could be in one place to avoid stress?

This guide will provide value in three main areas:

1. Excel Basics
2. Essential Formulas
3. Macro

First time using Excel or experienced, this guide can help.

If your aim is to be more productive and place all your data and important files in order then now is the time to start practicing.

I would definitely be interested in this. Not necessarily for myself, but mostly just so that if friends
and family have trouble with Excel (which happens more often than you'd think) I can give them this.

I've received this ebook and quickly scanned through it, and so far it seems pretty HQ except it's
essentially unreadable since you didn't use any real lay-out in your actual book.

The cover of it is nice, sure, but please just add some screenshots. Also, some pages only have 1
paragraph on them and have over half a page blank between paragraphs, while some pages are
completely filled so that it just becomes too much. Spread it out a bit more evenly and this will be
really nice. Also, what happened to the usual margins around a page? It looks quite odd.

I haven't actually looked into the content into detail yet, but from what I've read the text is really HQ.
Maybe someone (OP, or someone else?) could fix the lay-out up a bit and it'll actually be something
really nice to sell for a couple bucks? Because honestly it would make a massive difference.
