Try looking into adobe after effects!

polochon - February 26, 2017, 12:11 pm

Thanks for your answer , could you explain more ??

Google is your friend! Search on google for some adobe after effects tutorials!

polochon - February 26, 2017, 12:14 pm

Ok but i'm not sûre that they do like this but thanks!

Ho can hack clash royal please help

Anubis - March 20, 2017, 2:18 pm

You're asking how video editing is possible? Or how fake programs are working?
Seriously?

Not everyone is as knowledgeable as the mighty Anubis.

On topic, as said it could be video editing or a fake program. It's also fairly easy to manipulate the client side of Clash Royale, so you can give your self as many gems as you want but only on your device, it obviously doesn't work server side.
