Thread: [Google LAN Blocker V1 - Show captcha or slowdown the internet connection](#)

prilux - February 27, 2017, 8:27 am

This tool can do some real damage when using on specific cases, but lets leave this to other topic because i'm releasing it for free.

The main purpose of Google LAN Blocker V1 is to block google search engine on a LAN showing the captcha form to everyone nevertheless there is another effect while using this tool and that is to reduce the bandwidth available in the LAN network. This will slow down the internet connection for everybody using that LAN.

prilux - February 27, 2017, 10:07 am

Hi,

You just need to click in "Block!" and it will start make queries in google automatically (No visible info will be provided).

To slowdown the internet connection just hit the "Block!" button a few times to raise the amount of queries/traffic.

Regards

@Pylon

I didn't understand the nature of your reply. Can you be more specific?

ASiiMO - April 15, 2017, 12:29 am

Nice work bro! gonan check it out as soon as its downloaded!

THC - April 15, 2017, 9:45 am

Download with caution. May be infected, considering OP's previous activities. Uploading an analysis

in a few.
