Thread: [Funny thing.](#)

Techmech - February 27, 2017, 10:56 am

I see these people buy like comps for 1k+ and dont know shit about them probably clueless and shit.

Then i see these boys on like 100\$ comps fucking hardcore hacking on those shits.
Just shows the power of motivation happy now

phunted - February 27, 2017, 10:56 am

The quality of this thread is what everyone should strive to achieve here at hf.

Just shows the power of motivation.

What are you ranting about

tuNNelZ - February 27, 2017, 10:57 am

Omg, this made me get rich,get a girl friend, get laid, and most important get a 100 dollar pc.
Seriously? whats the point.

Just proves that even if you don't have much money, you can still be happy!
Life is a miracle man. Sadly, majority of humans have a wrong perception about life.

Well if you look into it 100 dollars in Indian Rupees is 6674.30

That's considered expensive.

Also it's not hard to do "hardcore" hacking since it just requires the knowledge to do it.

Levi - February 27, 2017, 11:05 am

Hardware limitations are mostly only present when you're required to do powerful computations which usually require multiple video cards, or when running several virtualisation boxes.

There's nothing unusual about people buying expensive hardware for personal use.

Im just saying as an example.

For example ive seen some people use the most shittiest pc's in the most poorest families and they know more than a computer fanboy & what he/she braggs about.

Just shows that its not really the money that holds back people.

Its the willing to do so.

7tyler - February 27, 2017, 11:20 am

I don't get what's funny about it. :/

Poroshenko - February 27, 2017, 11:30 am

Vouch, this method is great!

Ytube - February 27, 2017, 11:39 am

Who needs an expensive PC when you work in an Indian call centre, hahaha am I right boys?

Techmech - February 27, 2017, 11:42 am

Once again its not where you live or where you work.

That was not the point...
