Thread: [CPA Niche Idea - For Beginners](#)

GZUZ - February 28, 2017, 10:13 am

Hey fuckers,

whats up, its pretty easy to get a basic niche with a few simple google searches.

A pretty well working niche is the gaming one where you simply search for the next upcoming games in 2017 and create a demo or beta version of it.

Of course it would be fake and you would be promoting a fake niche but its easy money and you get a basic idea on how CPA works.

Here is an example I used back in 2013. Saints ROW IV was the niche:

There ya go: Spoiler [\(Click to View\)](#) [Video: <https://vimeo.com/205880449>]

Once you create a youtube video it should simply be boosted by around 5-10k views and 400-500 likes and dont worry about dislikes they will come from competetors or haters who want to take your video down. Those dislikes will make your video look even more legit. Also dont forget to add around 50-70 positive comments and delete the bad ones.

Its also always nice to thumb up a positive comment x10 to make it look even better.

Dont forget to create a nice looking landpage (like in the video above) with blogger/wordpress and use a bought domain for 0,99\$ for plus points.

Make sure the site is simple and clean and add a nice appealing download button. It is important you show your viewers how easy it is to complete a survey to get a demo of an unreleased game.

Once you have boosted just sit back and watch the \$ flow in.

You should be getting 30\$ a day in your second week once everything is set up and faked with views, likes & comments.

Hope y'all liked it. That's how I started with CPA and earned 400\$ in my first month.

This guide is for free & only shows how to advertise via YouTube (no Facebook, Instagram etc). ?

You can check by using the Google Keyword tool.

Lets say your niche is Saints Row 4.

You will search in Google Keyword tool for: "Saints Row 4 demo"

And depending on the results you choose the niche or you dont.

Usually anything between 20k-100k searches for your niches are fine.

If you aim for higher searches like 200k+ expect a lot of competetion regarding your niche. However if your niche is not saturated and not any demo of a game, you can achieve really good results.
Good luck.
