Thread: [Cryptix File Encrypter](#)

MR - X - February 28, 2017, 5:41 pm

Free File Encryption Software.

Took me a bit of time to get it finished and its not fully complete but it does work it and will help mask your target exe.

I tested some encrypted.exe made with it in windows VM with no issues.

The file encrypter itself can be ran in wine if using linux/unix .

As far as I know there are only a few errors which may happen if you run file encrypter from xp from the encrypted file will run in xp fine. Or if you run the encrypted file in windows 8 there may be issues.

I was able to use this and make prorat go from 40/58 detection down to 5/58

It should be noted this encrypter will add about a 3.5mb stub to your target exe used to self decrypt target exe at runtime.

And this only works with exe files.

This belongs to cryptography section, thanks for sharing through I guess. Have a nice day!

Redblock - March 1, 2017, 5:26 am

Thanks 4 sharing.

I tried it but 33 / 58 detection.

ravenn - March 4, 2017, 7:38 pm

It did not work for me, file deletes itself after encryption. Nice work though, might just be a bug..or

just me.

TheFisherman - *April 29, 2017, 12:19 am*

It gets detected by some avs
