Yeah I have the same thoughts.

You should really use Bitcoin or something else, where your money can't get refunded and traced.

1. Black out your eWhore username
2. Black out your eWhore customer

Both can bring you and your customer in danger / issues.

Edited:

For example:

1. I google your Gmail name (Megan Steele)
2. I add "kik" to it
3. I find the following site where you're acting like a 17 year old girl who's selling photos for a laptop...

So yes, you just (openly) advertised that you're hunting pedophiles while acting like a minor.
This can bring you in some issues, so just saying / warning you bro.
Money is nice, but freedom is better. ?
