Thread: [Not Receiving BTC Coinbase Payments?](#)

Invictum - March 1, 2017, 10:22 pm

I have a few people who ordered from me on Selly, and showed me their order, but it doesn't show received payments, nor does it show pending, is the Blockchain going that slow right now?

Hmm maybe we should switch to another coin as the main coin we use? Does ether has as slow confirmation times?

did u just say we should switch away from bitcoin

justg - March 3, 2017, 4:00 pm

yes bitcoin is having major issues for the past couple of days.

got a \$190 payment that has been pending with 0 confirmations for 3 days now

Darrell - March 3, 2017, 4:00 pm

The blockchain is clogged at the moment.

Hopsin - March 3, 2017, 4:01 pm

Confirmations are slow for many people. Some guy got it after 23 hours, other after 48 hours and so on.

My best guess is that BTC confirmation is delayed for you as well.

NinjaLeaks - March 3, 2017, 4:05 pm

Running fine for me, just sent a payment and it went through quick. Hmm.
